1. Simtora at a Glance

Item	Detail
Legal name	Simtora Technologies, Inc.
Type	Privately held U.S. C corporation
Industry	Enterprise software and IT services (cloud, data, security and AI)
Business model	Subscription software (SaaS) plus professional and managed services
Founded	2016
Headquarters	San Francisco, California, United States
Employees	About 230 in six countries: about 120 in the United States and about 110 in the five R&D centers abroad (see Section 6)
Customers	About 900 organizations in North America, Europe and Asia-Pacific, from growth-stage companies to large enterprises
Offices	Headquarters in San Francisco; five R&D centers in Lahore (Pakistan), Berlin (Germany), Paris (France), Sydney (Australia) and London (United Kingdom); regional hubs in other U.S. metro areas; some employees are fully remote
Legal entities	Simtora Technologies, Inc. (U.S. parent) and five wholly owned subsidiaries, one in each R&D country (see Section 6.3)
Fiscal year	Calendar year (January 1 to December 31)
Leadership	CEO, CFO, Chief People Officer, General Counsel, Head of IT / CISO and department heads (see Section 9)
Oversight	Board of Directors, with an Audit Committee and a Compensation Committee
Independent assurance	SOC 2 Type II report every year; ISO 27001 certification is a stated target; annual independent penetration tests

The figures above describe the Company as of the effective date and are updated at each annual review.

2. Our Story

Simtora was founded in 2016 in San Francisco by a small group of engineers and operations leaders who had spent years running technology for other companies. They saw the same problem everywhere: teams were buried under disconnected tools, manual processes and security work that always came last. They started Simtora to build software that makes business technology **simpler to run, easier to trust and smarter to use**.

Milestones

Year	Milestone
2016	Company founded and headquartered in San Francisco; first customers onboarded onto an early workflow automation service
2017	Simtora Flow released as a generally available product
2018	Lahore R&D center opened as Simtora's first engineering site outside the United States
2019	Simtora Insight launched for analytics and operational visibility
2020	Company adopts a hybrid work model as its default
2021	Simtora Shield introduced; first SOC 2 Type II report issued; Berlin R&D center opened to build Shield
2022	London R&D center opened for AI evaluation and safety work
2023	Professional Services and Managed Services practices formalized; Paris R&D center opened for applied AI research
2024	Simtora Assist, the AI assistant and agent platform, enters beta; Sydney R&D center opened for data platform engineering and Asia-Pacific reliability coverage
2025	Simtora Assist generally available; customer base passes 800 organizations
2026	First complete set of Company policy manuals adopted (September 30, 2026); international supplements and country HR manuals added (October 5, 2026)

3. Mission, Vision and Values

Mission

To make technology simple, secure and intelligent for every organization we serve, so that teams can spend their time on the work that matters.

Vision

To be the most trusted software partner for organizations that run on data, automation and AI.

Our values

Value	What it means in practice
Customer trust	Customers rely on us with their data and their operations. We protect that trust in how we build, secure and support our products, and we never overpromise.
Integrity	We do the right thing when nobody is watching. We are honest with customers, colleagues, partners and regulators, and we speak up when something is wrong.
Simplicity	We remove complexity for customers and for ourselves. If a process or a product is hard to explain, we fix it.
Ownership	We take responsibility for our work and its consequences, including the effect on the people who use what we build.
Respect	We treat every person with dignity, value different perspectives and give and receive feedback openly.
Continuous learning	We stay curious, share what we know and invest in growing our skills.

Strategic priorities (2026–2028)

1. **Grow with existing customers** by connecting our four product lines into one platform experience.
 2. **Lead in trustworthy AI** by building Simtora Assist with strong safety, privacy and human-oversight controls.
 3. **Earn and prove trust** through independent certifications, transparency and fast incident response.
 4. **Build a durable company:** profitable growth, a strong bench of leaders and a workplace people want to stay in.
-

4. What We Do

Simtora builds and runs software that helps organizations **automate work, understand their data, protect their systems and put AI to safe use**. We also help customers adopt that software and, where they prefer, operate it for them.

We do this in three ways:

Offering type	Description
Software products (SaaS)	Cloud-hosted products sold by annual or multi-year subscription, priced by users, usage or platform tier
Professional services	Implementation, integration, data migration, custom development and training delivered by Simtora consultants and engineers
Managed services and support	Ongoing operation, monitoring and 24×7 support for customers who want Simtora to run their environment

How a typical customer works with us

1. **Discover:** Sales and a solutions engineer learn the customer's goals and systems.
2. **Evaluate:** The customer trials the product; Security and Legal answer due-diligence questions.
3. **Contract:** Terms are agreed under the deal review rules in the Finance and Accounting Manual (SIM-FIN-001).

4. **Onboard:** Professional Services and Support configure the product and train users.
5. **Operate and grow:** Customer Success monitors adoption and health, and Support resolves issues.
6. **Renew:** Renewals are managed well before the term ends and are a shared responsibility of Sales and Customer Success.

5. Product Lines

Simtora has four software product lines and two service lines. They share one identity system, one data platform and one security model.

5.1 Simtora Flow – Workflow Automation and Integration

What it is: A low-code platform for automating business processes and connecting applications.

Feature	Benefit
Visual workflow designer	Business teams build automations without waiting for engineering
300+ prebuilt connectors	Connects common CRM, ERP, HR, finance, ticketing and cloud services
Approvals and human-in-the-loop steps	Keeps a person in charge of sensitive decisions
Audit trail	Every run is logged for compliance and troubleshooting

Typical buyers: Operations, IT and finance teams. **Typical use:** Employee onboarding, invoice approvals, ticket routing, data synchronization.

5.2 Simtora Insight – Analytics and Observability

What it is: A data and analytics platform that brings business and operational data into one place for dashboards, alerts and reporting.

Feature	Benefit
Unified data layer	One trusted source for metrics across systems
Dashboards and scheduled reports	Self-service reporting for managers and executives
Anomaly detection and alerting	Early warning on cost, performance and quality problems
Embedded analytics	Customers can offer analytics inside their own products

Typical buyers: Data, engineering and finance leaders. **Typical use:** Executive KPI reporting, cloud cost visibility, service-level monitoring.

5.3 Simtora Shield – Security and Compliance Automation

What it is: A platform that continuously monitors an organization's systems against security and compliance frameworks and collects the evidence auditors ask for.

Feature	Benefit
Continuous control monitoring	Finds gaps as they appear, not at audit time
Automated evidence collection	Cuts the time to prepare for SOC 2, ISO 27001 and similar audits
Vulnerability and asset visibility	One view of devices, cloud resources and users
Policy and training management	Distributes policies and tracks acknowledgment and training

Typical buyers: Security, compliance and IT leaders. **Typical use:** First-time SOC 2 readiness, vendor risk reviews, ongoing audit support.

5.4 Simtora Assist – AI Assistants and Agents

What it is: A platform for building and deploying AI assistants and task-performing agents that work with a customer's own data and tools.

Feature	Benefit
Grounded answers from customer knowledge	Assistants answer from approved company content and cite sources
Agent actions with approvals	Agents can act in other systems, with human approval for high-impact steps
Data isolation	Customer data is kept separate and is not used to train models without the customer's permission
Evaluation and monitoring tools	Customers can test quality, track usage and review outputs

Typical buyers: Support, operations and IT leaders. **Typical use:** Internal help desks, customer support assistance, document and knowledge search.

Simtora Assist is governed by the AI rules in the Code of Ethics and Compliance Manual (SIM-CMP-001) and the IT Policy Manual (SIM-IT-001), including review by the AI Review Board before new AI features launch.

5.5 Professional Services

Implementation and integration, data migration, custom development, training and enablement, security and compliance readiness projects. Work is delivered under a statement of work with defined scope, timeline and acceptance criteria.

5.6 Managed Services and Support

Tier	What is included
Standard Support	Business-hours support by portal and email; standard response targets
Premium Support	24×7 coverage for severe issues, faster response targets, named Customer Success contact
Managed Operations	Simtora operates and monitors the customer's Simtora environment, including upgrades, backups and reporting

Product summary

Product line	Category	Delivered as	Primary buyer
Simtora Flow	Automation and integration	SaaS	Operations / IT
Simtora Insight	Analytics and observability	SaaS	Data / Finance / Engineering
Simtora Shield	Security and compliance	SaaS	Security / Compliance
Simtora Assist	AI assistants and agents	SaaS	Support / Operations
Professional Services	Implementation and consulting	Project	All buyers
Managed Services and Support	Operations and support	Subscription	All buyers

Product names, features and packaging change as the portfolio evolves. The Product organization owns the current catalog.

6. Global Footprint and R&D Centers

Simtora is headquartered in **San Francisco, California**, and builds its products in five research and development (R&D) centers in four time zones outside the United States, plus engineering teams in the U.S. Working across these sites lets us hire the best people wherever they live, keep production and support covered around the clock, and stay close to customers in Europe and Asia-Pacific.

6.1 Where we operate

Location	Role	Main focus	Employees (approx.)	Local entity	Time zone
San Francisco, California, USA	Headquarters	Executive team; Product Management; Engineering leadership; Sales; Marketing; Finance, Legal, HR, IT and Facilities leadership	55	Simtora Technologies, Inc.	Pacific (UTC-8 / -7)
Other U.S. locations	Regional hubs and remote employees	Engineering, Sales, Customer Success, Support, Professional Services	65	Simtora Technologies, Inc.	Various
Lahore, Pakistan	Largest R&D center	Simtora Flow engineering; platform services; quality engineering and test automation; Tier 2 support engineering	45	Simtora Technologies (Pvt.) Limited	Pakistan (UTC+5)

Berlin, Germany	R&D center	Simtora Shield engineering; security research; privacy engineering for the EU	18	Simtora Technologies GmbH	Central European (UTC+1 / +2)	2021
London, United Kingdom	R&D center	AI evaluation, safety and red- teaming for Simtora Assist; platform engineering; EMEA customer engineering	18	Simtora Technologies UK Limited	UK (UTC+0 / +1)	2022
Paris, France	R&D center	Applied AI and machine- learning research for Simtora Assist; developer experience	15	Simtora Technologies SAS	Central European (UTC+1 / +2)	2023
Sydney, Australia	R&D center	Simtora Insight data-platform engineering; Asia-Pacific Site Reliability Engineering and support coverage	14	Simtora Technologies Pty Ltd	Australian Eastern (UTC+10 / +11)	2024

Headcounts are approximate and are updated at each annual review.

6.2 What each R&D center contributes

Center	Contribution
Lahore	The deepest bench of platform and integration engineers. Owns much of the Simtora Flow connector library and the shared platform services (identity, billing and audit services) used by every product, runs most automated testing, and provides Tier 2 support engineering that hands off to San Francisco and Europe.
Berlin	Home of Simtora Shield engineering. Builds continuous control monitoring and evidence collection, runs the Company's security research and vulnerability work, and leads privacy-by-design for the EU region of the platform.
London	Leads evaluation, safety testing and red-teaming for Simtora Assist and supports the AI Review Board with technical evidence. Also provides EMEA solutions engineering for enterprise customers.
Paris	Applied AI research: retrieval, agent planning, model evaluation and developer tools for Simtora Assist. Works closely with London and San Francisco.
Sydney	Builds the Simtora Insight data layer and anomaly detection. Provides the Asia-Pacific shift of the follow-the-sun SRE and support rota so that no team routinely works overnight.
San Francisco	Sets product strategy, owns the roadmap and architecture decisions, leads Sales, Marketing and the corporate functions, and hosts the Executive Team and Board meetings.

6.3 Legal entities

Simtora Technologies, Inc. (a Delaware corporation headquartered in San Francisco) owns 100% of each subsidiary below. Employees are employed by the entity in their country, not by the parent.

Entity	Country	Registered office city	Statutory leader
Simtora Technologies, Inc.	United States		

The subsidiaries perform contract R&D and related services for Simtora Technologies, Inc. under written intercompany agreements. **All intellectual property in Simtora products is owned by Simtora Technologies, Inc.** (see the Finance and Accounting Manual, SIM-FIN-001, Part 10, and the International Operations Supplement, SIM-GLB-001, Part 3).

6.4 One company, many sites

- **One engineering organization.** Teams are organized by product and mission, not by country. Most teams have members in two or more centers.
- **Follow-the-sun operations.** On-call, support and incident response are handed off between San Francisco, Sydney, Lahore and London so that regular coverage stays within local daytime hours wherever possible.
- **Shared tools and standards.** Every center uses the same identity system, source control, security controls and release process (IT Policy Manual, SIM-IT-001).
- **Customer data location.** Customers may choose a United States, European Union, United Kingdom or Australian hosting region for their Simtora tenant. Access to customer production data from any center is limited, logged and approved just-in-time (SIM-IT-001 and SIM-GLB-001, Part 1).
- **Shared working hours.** Local core hours remain 10:00 a.m. to 3:00 p.m. in each person's own time zone. Teams that span regions agree shared collaboration windows and rotate inconvenient meeting times fairly (SIM-HR-002, Part 1).
- **Local law first.** Each employee is covered by the law of the country where they work. The Company applies the same ethical standards everywhere and gives the **more protective** of the local law and the Company standard (see Section 14).

6.5 Country leadership

Note: As elsewhere in this document, the names are fictitious.

Center	Leader	Title	Reports to
Lahore	Hamza Siddiqui	Managing Director, Lahore R&D Center	Head of Engineering and Product
Berlin	Katrin Vogel	Managing Director (Geschäftsführer), Berlin R&D Center	Head of Engineering and Product
London	Olivia Hartley	Director, London R&D Center	Head of Engineering and Product
Paris	Camille Laurent	Président, Paris R&D Center	Head of Engineering and Product
Sydney	Mitchell Fraser	Director, Sydney R&D Center	Head of Engineering and Product

Country leaders hold the statutory director or officer role in their local entity, are the Site Lead for their office under the Facilities and Office Administration Manual (SIM-FAC-001), and work with the **International HR Lead** and a local HR partner. They sign contracts only within the authority set in the Finance and Accounting Manual (SIM-FIN-001, Section 1.2) and the International Operations Supplement.

7. Customers and Markets

Who we serve

Segment	Description	Typical needs
Growth companies	Startups and scale-ups, 50–500 employees	Fast setup, low overhead, first compliance certifications
Mid-market	Companies of 500–5,000 employees	Automation across departments, reporting, security posture
Enterprise	Large and regulated organizations	

Where our customers are

Region	Share of customers (approx.)	Served mainly from
North America	60%	San Francisco, other U.S. locations, Lahore (Tier 2 engineering)
Europe and the United Kingdom	25%	London, Berlin, Paris, with San Francisco
Asia-Pacific and other regions	15%	Sydney, Lahore, with San Francisco

Industries

Software and technology, financial services, healthcare and life sciences, retail and e-commerce, professional services, education and public sector.

Go-to-market

- **Direct sales** through account executives and solutions engineers.
- **Partners:** technology alliances, resellers and system integrators, who are bound by the Supplier and Partner Standards (see SIM-CMP-001 and SIM-PRC-001).
- **Self-service trials** for selected products.

Our commitments to customers

Commitment	Detail
Data protection	Customer data is classified Restricted and protected under the IT Policy Manual (SIM-IT-001)
Data location	Customers can choose a U.S., EU, UK or Australian hosting region; data stays in the chosen region except for access and transfers the contract allows
Availability	Service targets are set by system tier and stated in customer contracts

8. Technology, Security and Trust

Platform approach

- **Cloud-first.** Production runs on approved public cloud providers. Simtora operates little on-premises technology.
- **One platform, many products.** Shared services for identity, data, billing, auditing and APIs let customers combine products easily.
- **Infrastructure as code.** Infrastructure is defined in version-controlled code and deployed through reviewed, automated pipelines.
- **Open standards and APIs.** Every product provides documented APIs and integrations.

Security and privacy

Area	Approach
Certifications and audits	SOC 2 Type II each year; ISO 27001 as a target; annual independent penetration tests
Access	Multi-factor authentication for everyone; phishing-resistant authentication for privileged access; least privilege and just-in-time administrator access
Data	Four data classes (Public, Internal, Confidential, Restricted); encryption in transit and at rest; regional hosting (U.S., EU, UK, Australia) with controlled cross-border access
Privacy law	CCPA/CPRA in California; GDPR in the EU; UK GDPR; the Australian Privacy Act; Pakistani law where it applies (see SIM-GLB-001, Part 2)
Secure development	Code review, automated scanning, signed releases and a software bill of materials for products
Resilience	Systems are tiered by criticality with defined recovery objectives; Tier 0 systems target a 15-minute data-loss limit and 4-hour recovery time
Incident response	Severity 1 incidents get a response within 15 minutes; executives are told within 1 hour; each incident is reviewed within 10 business days
Vulnerability disclosure	Researchers can report issues to <code>security@simtora.example</code>

Responsible AI

Simtora treats AI as a powerful tool that needs guardrails.

- New AI features go through review by the AI Review Board before launch.
- Employees may use only tools on the Approved AI Tools list, and never put Restricted data into an unapproved tool.
- AI-generated code follows the same review and testing rules as any other code.

- Customers are told how AI is used in our products and can rely on clear commitments about their data.

Details are in the IT Policy Manual (Part 4) and the Code of Ethics and Compliance Manual (SIM-CMP-001).

9. Executive Leadership

Simtora is led by the Executive Team, which reports to the CEO and, through the CEO, to the Board of Directors. Country leaders of the five R&D centers are listed in Section 6.5; they are not members of the Executive Team but attend its quarterly international review.

Note: The names below are fictitious, like the Company itself. Descriptions use role titles and neutral language.

8.1 Chief Executive Officer (CEO) – Daniel Reyes

Co-founder and CEO since 2016. Sets Company strategy, leads the Executive Team, represents Simtora to customers, investors and the Board, and approves all policy manuals. Previously led platform operations at a large enterprise software company.

8.2 Chief Financial Officer (CFO) – Priya Nair

Leads Finance, Accounting, Payroll, Tax, Treasury and Procurement for the parent and all five subsidiaries. Owns the Finance and Accounting Manual (SIM-FIN-001), chairs the Finance Control Committee and manages the annual budget cycle, insurance, financing, intercompany arrangements and transfer pricing. Also oversees Facilities and Office Administration.

8.3 Chief People Officer (CPO) – Marcus Ellison

Leads Human Resources, Talent Acquisition, Learning and Development, Total Rewards, Employee Relations and workplace culture, in the United States and in all five R&D countries through an International HR Lead and local HR partners. Owns the HR Policy Manual (SIM-HR-001), the Global People Supplement (SIM-HR-002) and the five Country HR Manuals (SIM-HR-101 to SIM-HR-105). Escalation point for employee matters after the manager and HR.

8.4 General Counsel (GC) – Hannah Whitfield

Leads Legal, Compliance and Privacy. Owns the Code of Ethics and Compliance Manual (SIM-CMP-001) and the International Operations Supplement (SIM-GLB-001), chairs the Compliance Committee and the AI Review Board, manages the Compliance Officer and retains local counsel in each R&D country. The Privacy Lead also acts as Group Data Protection Officer for the EU and UK. The Compliance Officer has a direct line to the Audit Committee.

8.5 Head of IT / Chief Information Security Officer (CISO) – Omar Haddad

Leads IT operations and information security. Owns the IT Policy Manual (SIM-IT-001), chairs the IT & Security Steering Committee and reports risk to the CEO and the Audit Committee.

8.6 Head of Engineering and Product – Elena Vasquez

Leads Product Management, Engineering, Site Reliability Engineering (SRE) and Design, including the five R&D centers. Owns the product roadmap, platform architecture and the release process. The R&D country leaders report to this role.

8.7 Head of Sales – Thomas Okafor

Leads Sales, Solutions Engineering, Partnerships and Sales Operations. Responsible for revenue growth, customer contracts (with Legal and Finance) and partner relationships.

8.8 Head of Customer Success and Support – Grace Lin

Leads Customer Success, Technical Support and Professional Services delivery. Owns customer satisfaction, adoption, renewals (with Sales) and the on-call support model.

8.9 Head of Marketing – Sofia Bianchi

Leads Brand, Product Marketing, Communications and Demand Generation. Owns the Company's brand and website content (IT owns hosting and security of the website).

8.10 Head of Procurement – Aisha Rahman

Leads sourcing, vendor onboarding, contract renewals and supplier relationships. Owns the Procurement Policy Manual (SIM-PRC-001). Reports to the CFO with direct access to the Compliance Officer on integrity matters.

8.11 Head of Facilities – Robert Kowalski

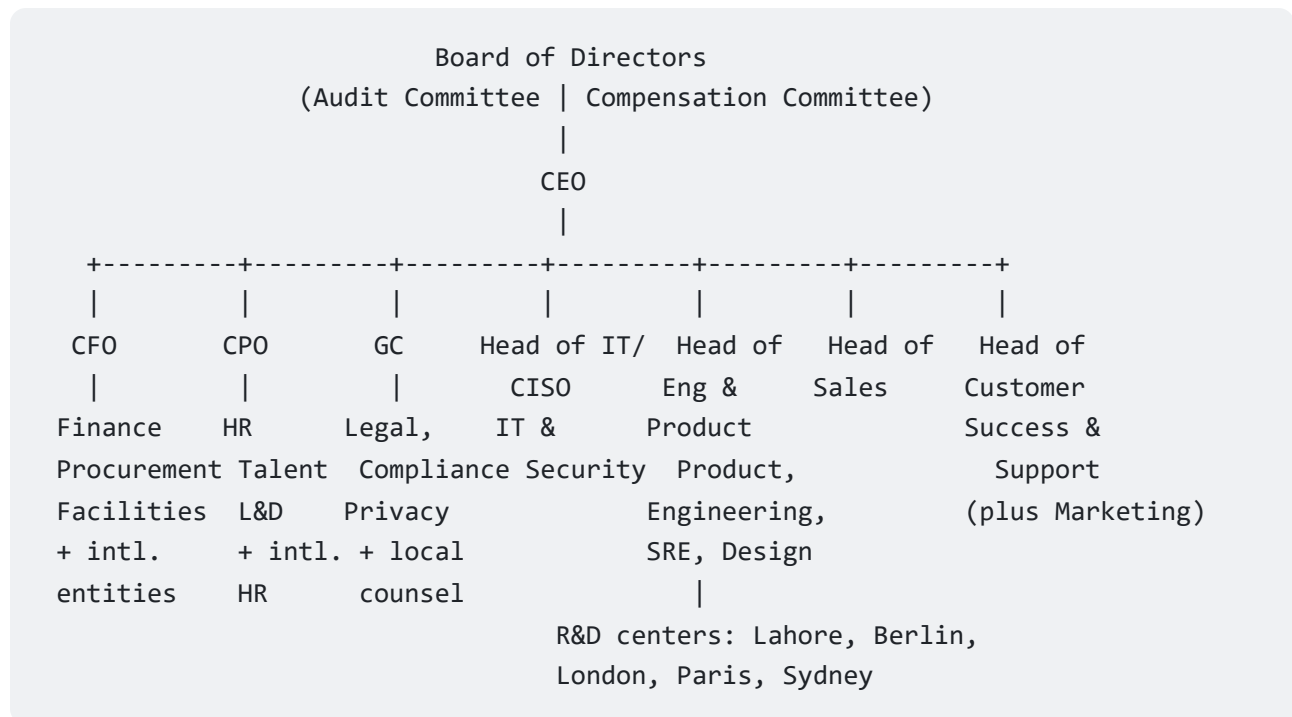

Leads workplace, health and safety, security, space planning and office administration. Owns the Facilities and Office Administration Manual (SIM-FAC-001). Reports to the CFO with a direct line to the CPO and CEO on safety and security.

Executive team summary

Role	Name	Areas led	Manual owned
CEO	Daniel Reyes	Strategy, Executive Team	This overview
CFO	Priya Nair	Finance, Procurement, Facilities	SIM-FIN-001
Chief People Officer	Marcus Ellison	HR, Talent, Learning	SIM-HR-001, SIM-HR-002, SIM-HR-101 to 105
General Counsel	Hannah Whitfield	Legal, Compliance, Privacy	SIM-CMP-001, SIM-GLB-001
Head of IT / CISO	Omar Haddad	IT, Security	SIM-IT-001
Head of Engineering and Product	Elena Vasquez	Product, Engineering, SRE	–
Head of Sales	Thomas Okafor	Sales, Partnerships	–
Head of Customer Success and Support	Grace Lin	Support, Success, Services	–
Head of Marketing	Sofia Bianchi	Brand, Marketing	–
Head of Procurement	Aisha Rahman	Sourcing, Vendors	SIM-PRC-001
Head of Facilities	Robert Kowalski	Workplace, Safety	SIM-FAC-001

10. Organization and Governance

10.1 Company structure

Each R&D center is a wholly owned subsidiary (Section 6.3). Corporate functions (Finance, HR, Legal, IT, Facilities) serve all entities; the country leader runs the local site day to day.

10.2 Board and committees

Body	Role
Board of Directors	Oversees strategy, major financial decisions, executive leadership, real property leases, debt and equity. Approves spending above \$500,000 with the CEO.
Audit Committee	Oversees financial reporting, internal and external audit, compliance and the Ethics Line. Receives reports directly from the Compliance Officer, the CFO and the CISO.
Compensation Committee	Oversees executive pay, equity and Company-wide compensation programs.

10.3 Management committees

Committee	Chair	Meets	Purpose
-----------	-------	-------	---------

10.4 Decision rights

The approval levels for spending and contracts are set in the Finance and Accounting Manual (SIM-FIN-001, Section 1.2) and are summarized below. They apply in U.S. dollar equivalents to every entity and every country.

Total committed value	Approval required
Up to \$5,000	Budget owner
Up to \$25,000	Department Head
Up to \$100,000	Department Head and CFO
Up to \$500,000	CFO and CEO
Above \$500,000	CEO and Board

10.5 Escalation path for employee concerns

Employee → manager → HR → Chief People Officer → CEO. Matters involving the Executive Team go to the CEO with the Board. Ethics concerns can always go to the Ethics Line (`ethics@simtora.example` , anonymous reports accepted) or to the Audit Committee (`audit@simtora.example`). Employees in the five R&D countries use the same channels, plus their local HR partner and the local channels described in their Country HR Manual (for example, the works council in Germany or the Harassment Inquiry Committee in Pakistan).

11. How We Work

11.1 Hybrid by default

Element	Standard
Work model	Hybrid: minimum 3 office days per week, with Tuesday to Thursday as anchor days (all locations)
Fully remote roles	Some roles are fully remote by agreement, within the country where the employee is employed
Core hours	10:00 a.m. to 3:00 p.m. local time
Standard week	Monday to Friday, 8 hours a day in the U.S.; in other countries the standard week follows local law and the Country HR Manual
On-call teams	SRE, Support and Security follow published rotation schedules, organized as follow-the-sun where possible
Home office support	500one – <i>time equipment allowance</i> (upto 1,000 for fully remote), plus \$75 a month connectivity stipend, paid in local currency equivalents outside the U.S. (SIM-HR-002, Part 1)

11.2 Offices

Simtora's hubs and R&D centers are designed for collaboration on anchor days. They offer booked desks and rooms, shared meals on anchor days (adapted to local custom), and secure areas for network equipment and sensitive work. Badge access, visitor procedures, safety and emergency arrangements are in the Facilities and Office Administration Manual (SIM-FAC-001), with country rules in the International Operations Supplement (SIM-GLB-001, Part 5).

11.3 Working across time zones

Element	Standard
Shared windows	Teams spanning regions agree one or two shared collaboration windows (typically 2–3 hours) and record them in the team charter
Fair rotation	Meetings outside someone's local core hours rotate so that no one site always bears the early or late slot
Asynchronous first	Decisions are written down so that colleagues in other time zones can contribute without joining live
Right to disconnect	Employees are not expected to answer messages outside working hours unless they are on call; local law may give stronger rights
Follow-the-sun handoff	Handoffs between sites use a written handoff note in the incident or ticket system

11.4 Tools

Employees receive a Company laptop and standard software on day one. Access is provisioned through the identity system, protected with multi-factor authentication and reviewed regularly. Details are in the IT Policy Manual (SIM-IT-001).

11.5 A typical first 90 days

Time	What happens
Before day 1	Laptop shipped or prepared, accounts created, welcome from manager; employment contract signed in the local language where law requires
Day 1	Badge and accounts ready; orientation with HR and IT
Within 30 days	Required training: security, privacy, code of conduct and anti-harassment; Code of Ethics certification
Within 60 days	Role-based training (for example, secure coding for engineers, anti-corruption for sales)
Day 90	

12. Culture and People

12.1 The Simtora employee experience

Area	Highlights
Time off	In the U.S.: 15, 20 or 25 PTO days depending on service; 11 paid holidays plus 2 floating; 8 sick and safe leave days. Elsewhere: statutory or better leave, set out in each Country HR Manual (for example, 30 days in Germany, 25 in the UK and Australia) plus local public holidays
Parental leave	A global standard of 12 weeks for a primary caregiver and 6 weeks for a secondary caregiver at full pay, after 6 months of service, topped up on top of statutory pay where local law is lower or pays less
Learning	\$1,500 a year learning budget (local currency equivalent) plus 40 hours of paid learning time
Pay	Bi-weekly direct deposit every other Friday in the U.S.; in each other country, the pay frequency set by local law and practice (monthly in most)
Recognition	Company-wide recognition budget and spot awards
Wellbeing	Employee Assistance Program (global), ergonomic support, lactation and quiet rooms
Benefits	In the U.S., health coverage and a 401(k) retirement plan; in each other country, the statutory social insurance and pension arrangements plus the Company benefits described in the Country HR Manual

12.2 Inclusion and respect

Simtora is an equal opportunity employer in every country. We do not tolerate harassment, discrimination or retaliation. Concerns can be raised with a manager, HR

(hr@simtora.example) or the Ethics Line, and harassment complaints are acknowledged

within 2 business days. We respect religious, cultural and national observances at every site, including Ramadan and Eid in Lahore, Easter and Christmas traditions in Europe, and Australia's public holidays.

12.3 Growth

Employees have regular one-to-one meetings, development plans and internal mobility, including transfers and short assignments between sites. Managers receive training within their first 60 days.

13. Responsible Business

Area	Commitment
Ethics and integrity	We follow the Code of Ethics and Compliance Manual in every country: anti-bribery (U.S. FCPA, UK Bribery Act, French Sapin II and local laws), conflicts of interest, gifts limited to \$50 per source per year without approval (local currency equivalent), no facilitation payments and fair competition
Speaking up	Anyone can report a concern without fear of retaliation; reports are acknowledged within 5 business days
Privacy	We honor privacy rights: requests are acknowledged within 10 business days and answered within 45 days (within one month where GDPR or UK GDPR applies)
Supply chain	Vendors are screened and must meet our Supplier and Partner Standards
Environment	Recycling and energy measures in offices; target of at least 60% waste diversion at hubs; responsible hardware disposal through certified recyclers
Community	Charitable donations up to \$5,000 can be approved by a Department Head with a Compliance check; larger gifts need CEO and General Counsel approval
Workplace safety	Compliance with OSHA and state law in the U.S., and with the equivalent health and safety law in each other country; same-day injury reporting; trained wardens and first aiders in every office
Modern slavery and human rights	Supplier screening in all countries; statutory modern slavery statements filed where the thresholds in the UK or Australian laws are met (Legal reviews annually)

14. Our Policy Framework

Simtora's rules are set out in six policy manuals, which apply Company-wide, and in supplements that adapt them to the countries where we work. Each document has a

named owner and is approved by the CEO. Effective date for the six manuals: September 30, 2026. Effective date for the supplements: October 5, 2026.

14.1 The six policy manuals

Manual	Document ID	Owner	Covers
HR Policy Manual	SIM-HR-001	Chief People Officer	Hiring, pay, leave, conduct, performance, hybrid work, benefits, separation (for U.S. employees; the base standard for all)
IT Policy Manual	SIM-IT-001	Head of IT / CISO	Acceptable use, access, data protection, devices, AI tools, cloud, incident response
Code of Ethics and Compliance Manual	SIM-CMP-001	General Counsel	Ethics, anti-bribery, conflicts, privacy, AI governance, trade compliance, speaking up
Finance and Accounting Manual	SIM-FIN-001	CFO	Approvals, budgets, payments, close, payroll, expenses, revenue, treasury, tax
Procurement Policy Manual	SIM-PRC-001	Head of Procurement	Sourcing, vendor onboarding, contracts, renewals, contractors
Facilities and Office Administration Manual	SIM-FAC-001	Head of Facilities	Offices, badges, visitors, safety, emergencies, assets, leases

14.2 International supplements

Document	Document ID	Owner	Covers
----------	-------------	-------	--------

14.3 Which rule applies to me?

1. **The law of the country where you work** always applies and cannot be reduced by any Simtora policy.
2. **Your Country HR Manual** (or, in the U.S., the HR Policy Manual with the Global People Supplement's U.S. part) sets your employment terms.
3. **The Company-wide manuals** apply to everyone for ethics, security, finance, procurement and facilities, as adapted by the International Operations Supplement.
4. Where two rules differ, you receive **the more protective for you** on employment rights and **the stricter** on security, ethics and compliance.
5. U.S.-specific legal references (FLSA, FMLA, ADA, at-will employment, 401(k), I-9, COBRA and similar) in the HR Policy Manual apply only to U.S. employees.

Which manual answers my question?

If you want to know about...	Go to
Time off, pay, benefits, harassment, performance	HR Policy Manual (U.S.) or your Country HR Manual
How a U.S. policy applies in my country	Global People Supplement and my Country HR Manual
Passwords, devices, AI tools, reporting a lost laptop, data handling	IT Policy Manual, with SIM-GLB-001 Part 1 for data location and cross-border access
Gifts, conflicts of interest, a concern about wrongdoing, privacy requests	Code of Ethics and Compliance Manual, with SIM-GLB-001 Part 2 for local laws
Expenses, company cards, budgets, who can sign a contract	Finance and Accounting Manual, with SIM-GLB-001 Part 3 for currencies, VAT/GST and local payroll
Buying from a vendor, renewing a contract, hiring a contractor	Procurement Policy Manual, with SIM-GLB-001 Part 4
Booking a desk, badges, visitors, emergencies, office issues	Facilities and Office Administration Manual, with SIM-GLB-001 Part 5 for local safety law

Every employee is expected to read the manuals relevant to their role, complete the required training and certify their understanding to the Code of Ethics within 30 days of hire and once a year after that. Where local law requires, policies and training are provided in the local language (for example, French in France).

15. Key Contacts

All addresses use the reserved `.example` domain.

For	Contact
HR questions, accommodations, leave	hr@simtora.example
HR questions from employees outside the U.S.; local employment matters	hr-intl@simtora.example (International HR Lead and local HR partners)
Privacy requests and the Group Data Protection Officer (EU and UK)	privacy@simtora.example
Report an ethics or compliance concern (anonymous reports accepted)	ethics@simtora.example
Concerns about accounting, audit or the Executive Team	audit@simtora.example (Audit Committee)
Compliance questions (gifts, conflicts, privacy, training)	compliance@simtora.example
IT Helpdesk	it@simtora.example
Security incidents and vulnerability reports	security@simtora.example
General finance questions	finance@simtora.example
Invoices, vendors, company cards, expense claims	ap@simtora.example
Customer billing and collections	billing@simtora.example

Payroll	<code>payroll@simtora.example</code>
Purchase requests, sourcing, vendor onboarding	<code>procurement@simtora.example</code>
Office issues, badges, visitors (non-emergency)	<code>facilities@simtora.example</code>
Emergencies	Call the local emergency number first (911 in the U.S.; 112 in Germany and France; 999 or 112 in the UK; 000 in Australia; 15 for police and 1122 for Rescue, ambulance and fire in Lahore; the Facilities Portal lists the numbers for each office), then the site security line posted in your office

Lost or stolen device? Report it to IT Security within 1 hour of discovery.

16. Frequently Asked Questions

What does Simtora actually sell? Cloud software for automation (Flow), analytics (Insight), security and compliance (Shield) and AI assistants (Assist), plus services to implement, run and support them.

Is Simtora a public company? No. Simtora is privately held. If that changes, additional securities and reporting policies will be adopted.

Where do employees work? Simtora is headquartered in San Francisco and has R&D centers in Lahore, Berlin, London, Paris and Sydney (Section 6). Most employees work in a hybrid pattern from an office and from home. Some roles are fully remote within the country where they are employed. See Section 11.

Which country's rules apply to me? The law of the country where you work, then your Country HR Manual, then the Company-wide manuals. Where rules differ, you get the more protective rule on employment rights and the stricter rule on security and ethics. See Section 14.3.

Who owns the technology the R&D centers build? Simtora Technologies, Inc. owns all intellectual property, under employment terms and intercompany agreements that comply with local law (for example, German and French rules on employee inventions).

Can I work from another country? Not without approval. Tax, immigration, social security and export-control rules can apply. See the Global People Supplement (SIM-HR-002, Part 1).

Who is Simtora accountable to? The Board of Directors and its Audit and Compensation Committees, and to customers, employees and regulators through contracts and law.

Does Simtora use customer data to train AI models? No, not without the customer's permission.

How do I raise a concern about something that seems wrong? Tell your manager, HR or the Compliance Officer, or use the Ethics Line (ethics@simtora.example), which accepts anonymous reports. Retaliation for raising a concern in good faith is prohibited.

Who decides whether we can sign a contract? It depends on the total value: see Section 10.4 and the Finance and Accounting Manual (SIM-FIN-001). Contracts above \$25,000 or with non-standard terms are reviewed by Legal. Country leaders have no extra signing authority beyond that matrix.

Where can I find the full policies? In the six policy manuals and the international supplements listed in Section 14.

17. Glossary

Term	Meaning
AI Review Board	Committee chaired by the General Counsel that reviews AI features and AI use
Anchor days	Tuesday to Thursday, when hybrid employees are expected to be in the office
Audit Committee	

18. Revision History

Version	Date	Author	Approved by	Summary of changes
