

Simtora Technologies, Inc.

Facilities and Office Administration Manual

Document ID	SIM-FAC-001
Version	1.1
Owner	Head of Facilities (reports to the Chief Financial Officer; direct access to the Chief People Officer and the CEO on health, safety and security)
Approved by	Chief Executive Officer
Effective date	September 30, 2026
Review cycle	Annually, or sooner when the law, a lease, an office, the work model or the risk picture changes
Applies to	All employees, officers, contractors, agency workers, visitors and vendors who enter, use or work in a Simtora Technologies, Inc. ("Simtora" or "the Company") office, and everyone who requests or provides facilities and office services, including remote employees who use Company-provided equipment, shipments or emergency notifications
Related manuals	HR Policy Manual (SIM-HR-001); Global People Supplement (SIM-HR-002); International Operations Supplement (SIM-GLB-001, Part 5); IT Policy Manual (SIM-IT-001); Code of Ethics and Compliance Manual (SIM-CMP-001); Finance and Accounting Manual (SIM-FIN-001); Procurement Policy Manual (SIM-PRC-001)

Contents

Introduction

Part 1 – Governance, Scope and Roles

- 1.1 Facilities Function and Roles
- 1.2 Scope, Office Types and Service Standards
- 1.3 Requesting Services: The Facilities Portal and Helpdesk
- 1.4 Budget, Approvals and Spending Authority
- 1.5 Exceptions to This Manual
- 1.6 Non-Compliance and Raising Concerns

Part 2 – Physical Security and Access Control

- 2.1 Security Principles and Zones
- 2.2 Badges and Access Credentials
- 2.3 Visitors and Guests
- 2.4 Secure Areas: Network Rooms, Labs and Storage
- 2.5 Video Surveillance (CCTV) and Monitoring
- 2.6 After-Hours Access, Lone Working and On-Call Staff
- 2.7 Security Personnel, Reception and Package Screening
- 2.8 Government Visits, Search Warrants and Law-Enforcement Requests
- 2.9 Security Incidents, Lost Badges and Theft

Part 3 – Workplace Operations and Amenities

- 3.1 Hybrid Space Planning and Desk Booking
- 3.2 Meeting Rooms and Collaboration Spaces
- 3.3 Accessibility, Accommodations and Inclusive Facilities
- 3.4 Lactation, Wellness and Quiet Rooms
- 3.5 Office Supplies and Consumables
- 3.6 Pantries, Meals and Food Safety
- 3.7 Cleanliness, Housekeeping and Shared-Space Etiquette

- 3.8 Mail, Shipping, Printing and Reception Services
- 3.9 Parking, Commuting and Bicycle and EV Facilities
- 3.10 Company Events, Offsites and Meeting Venues

Part 4 – Building Systems and Technology Infrastructure Support

- 4.1 Building Maintenance Program
- 4.2 Power, UPS and Generators
- 4.3 HVAC, Temperature and Air Quality
- 4.4 Audio-Visual and Conference Room Technology
- 4.5 Network Rooms, Cabling and Environmental Monitoring
- 4.6 Water, Plumbing, Lighting and Building Alerts
- 4.7 Office Design, Moves and New Office Opening

Part 5 – Assets, Inventory and Logistics

- 5.1 Facilities Assets and the Asset Register
- 5.2 Receiving, Staging and Outbound Shipping
- 5.3 Equipment for Remote Employees
- 5.4 Furniture and Ergonomics
- 5.5 Retirement, Disposal and E-Waste
- 5.6 Off-Site Storage and Physical Records

Part 6 – Health, Safety, Emergency Management and Sustainability

- 6.1 Health and Safety Program and Incident Reporting
- 6.2 Emergency Action Plans, Wardens and Drills
- 6.3 First Aid, AEDs and Medical Emergencies
- 6.4 Fire Safety and Fire Protection Systems
- 6.5 Severe Weather, Natural Hazards and Shelter in Place
- 6.6 Workplace Violence, Active Threats and Bomb Threats
- 6.7 Business Continuity for Facilities and Office Closure
- 6.8 Emergency Notification and Remote-Employee Safety
- 6.9 Sustainability and Environmental Responsibility

Part 7 – Leases, Vendors and Contractors

- 7.1 Real Estate, Leases and Landlord Management
- 7.2 Facilities Vendor Management
- 7.3 Janitorial, Pest Control, Landscaping and Other Recurring Services
- 7.4 Contractors, Construction and Work on Premises
- 7.5 Vendor Performance, Insurance and Records

Part 8 – Records, Monitoring and Training

- 8.1 Facilities Records and Retention
- 8.2 Inspections, Audits and Metrics
- 8.3 Training and Awareness

Appendices

- A. Facilities Portal Request Categories and Service Targets
- B. Visitor Pre-Registration Fields and Visitor Rules Summary
- C. Emergency Contacts and Quick Reference
- D. Approval Matrix for Facilities Decisions
- E. Inspection and Testing Calendar
- F. New Office Opening and Office Closure Checklists
- G. Emergency Action Plan Outline
- H. Incident Report Fields
- I. Vendor-on-Premises Rules and Contractor Safety Checklist
- J. Glossary
- K. Revision History

Introduction

This Facilities and Office Administration Manual explains how Simtora Technologies, Inc. runs its offices and the services people need to work in them safely, securely and comfortably. Simtora is a hybrid company: most employees come to an office on the Tuesday, Wednesday and Thursday anchor days and at least three days a week, some employees are fully remote, and several teams (Site Reliability Engineering, Support and Security) are on call outside normal hours. Our physical spaces therefore have to do three

jobs. They must be **safe** for everyone who enters, **secure** enough to protect people, customer data and Company assets, and **flexible** enough to support collaboration without wasted space.

The manual covers physical security, workplace operations, building systems that support technology, assets and logistics, health and safety, emergency planning, sustainability, leases and facilities vendors. It works with the other Simtora manuals:

- The **HR Policy Manual** sets the employee-facing rules on health and safety (4.3), the drug- and alcohol-free workplace (4.2), reasonable accommodation (4.1), the hybrid work model, equipment and the home-office allowance (7.4). This manual sets how Facilities delivers them.
- The **IT Policy Manual** sets IT asset management (2.2), secure disposal (2.4), acceptable use (4.1), physical security of IT areas (5.3), clear-desk rules (4.7) and business continuity (7.3). This manual controls the buildings and rooms in which those rules operate.
- The **Finance and Accounting Manual** sets approval limits (1.2), lease accounting (2.6), petty cash (4.9), capitalization and the fixed asset register (7.1 to 7.3) and insurance (6.6).
- The **Procurement Policy Manual** sets how Facilities buys space, fit-out, services and supplies (6.2, 6.6).
- The **Code of Ethics and Compliance Manual** sets ethics, gifts, conflicts, environmental responsibility (5.4) and how to handle government visits (6.6).

Our facilities principles

Every rule here follows from seven commitments. Simtora will:

1. **Put safety first.** Nobody's schedule, budget or convenience outranks safety. Anyone may stop unsafe work and report a hazard without fear of retaliation (HR 4.3).
2. **Be secure without being intrusive.** Security measures are proportionate, explained and applied fairly. We protect people and assets, and we respect privacy: no cameras in private areas, no audio recording, no tracking of protected activity, and no biometric collection without Legal review.
3. **Welcome everyone.** Our spaces are accessible, inclusive and usable by people of different abilities, faiths, dietary needs and family situations. Accommodations are handled through HR 4.1 and delivered by Facilities.

4. **Match space to how we work.** We plan for the hybrid pattern of anchor days rather than assigning a desk to every person, and we use data to adjust.
5. **Use resources responsibly.** Space, energy, supplies and equipment are Company assets. We buy under the Procurement manual, track under the IT and Finance manuals and recycle or dispose of them properly.
6. **Prepare for the unexpected.** Emergencies are planned for, practiced and communicated to everyone, including people who work from home.
7. **Be easy to work with.** Requests go through one portal, have clear service targets and get a response. Rules are scaled to risk so that replacing a lightbulb is not treated like signing a lease.

How to use this manual

- **Employees:** read Part 2 (badges and visitors), 3 (desk booking, rooms, amenities) and 6 (safety and emergencies). Use the Facilities Portal for requests (1.3).
- **Hosts of visitors:** read 2.3 and Appendix B.
- **Managers and Department Heads:** read 1.4, 3.1, 5.4 and 6.1.
- **Facilities staff and fire wardens:** read the whole manual, especially Parts 4, 6 and 7.
- **Anyone hiring a vendor for work on premises:** read 7.2 to 7.4 and Appendix I.
- Each policy states **Purpose, Scope, Policy and Responsibilities** where they fit. Where a section says "Facilities," it means the Head of Facilities and the team, including the Office Administrators and facilities vendors acting for them.
- **Where the law is stricter or more generous** than this manual (for example, a state or local safety, accessibility, privacy or lactation law), the law prevails. Where an office lease or building rule is stricter, follow that too.

Locations outside the United States

This manual covers the San Francisco headquarters, the regional hubs and the R&D centers in Lahore, Berlin, Paris, Sydney and London. Its safety and security standards apply everywhere, but the details in this manual were written for U.S. sites. At the five R&D centers: **use the local emergency number, not 911** (112 in Germany and France; 999 or 112 in the UK; 000 in Australia; 15 and 1122 in Lahore); the references to OSHA, the 988 Lifeline and "Run, Hide, Fight" are U.S. examples, and non-U.S. sites follow local law and the guidance in the International Operations Supplement (SIM-GLB-001), **Part 5**; and local privacy and labor law adjusts CCTV retention, visitor logs and badge rules (for example, 72-

hour CCTV retention in Germany). Each R&D center's Site Lead is its country leader. The Head of Facilities remains responsible for the standards at every site.

Roles and responsibilities

Role	Responsibilities
CEO	Approves this manual; accountable for a safe and secure workplace; approves leases and capital commitments at CEO level (1.4).
Board	Approves the sale or lease of real property and any commitment over \$500,000 (Finance and Accounting Manual 1.2).
Chief Financial Officer	Executive owner of Facilities; approves leases and capital spend with the CEO; owns lease accounting through the Controller.
Head of Facilities	Owens this manual; runs the Facilities function, safety program, building operations and vendors; reports monthly to the CFO and quarterly to the Executive Team on safety and security.
Chief People Officer	Co-owns workplace health and safety with the Head of Facilities (HR 4.3); owns accommodations, incident case management and OSHA recordkeeping with HR.
Head of IT / CISO	Sets security requirements for IT areas and equipment; co-approves access to secure areas; owns data destruction and IT assets (IT 2.2, 2.4, 5.3).
General Counsel	Reviews leases and facilities contracts; owns government-visit response; approves CCTV footage release together with the Chief People Officer where required (2.5).
Compliance Officer	Owens environmental-compliance monitoring and vendor due diligence with Procurement (Code of Ethics and Compliance Manual 5.4, 6.5).
Controller	Records leases, fixed assets and disposals; verifies petty cash; is told of leases before signing (Finance and Accounting Manual 2.6, 7.1 to 7.3).
Head of Procurement	Sources space-related services, fit-out and supplies with Facilities under the Procurement manual (6.2, 6.6).

Office Administrators	Front-line service: reception, mail, supplies, meeting rooms, visitor management, vendor coordination and portal tickets.
Facilities Technicians and Building Vendors	Perform maintenance, testing and repairs under the inspection calendar (Appendix E).
Emergency Response Team (ERT)	A trained group at each office (Chief Warden, floor wardens, deputies, first aiders, Facilities lead) that leads evacuation and first response (6.2).
Department Heads and managers	Ensure their teams follow this manual, nominate wardens, approve space and equipment requests, and act on hazards reported (1.4, 3.1, 6.1).
All employees, contractors and agency workers	Wear badges, follow visitor and safety rules, report hazards and incidents, and know their evacuation route.
Visitors and vendors on premises	Sign in, follow safety and escort rules and obey building staff in an emergency.

Part 1 – Governance, Scope and Roles

1.1 Facilities Function and Roles

Purpose. To make clear who runs facilities at Simtora and how decisions are governed.

Scope. All Simtora offices and the services that support them.

Policy

- **Ownership.** The Head of Facilities owns this manual and reports to the Chief Financial Officer. On health, safety and security, the Head of Facilities has a direct line to the Chief People Officer and the CEO and reports to the Executive Team quarterly (HR 4.3).

- **Facilities team.** The function includes the Head of Facilities, a Facilities Manager for each office of more than 50 people (an Office Administrator covers smaller offices), a Safety and Security Lead, and an Office Administrator team. Building engineers, technicians, cleaners, guards and other services are provided by vendors under the rules in Part 7.
- **Facilities & Workplace Committee.** A committee meets **quarterly** to review space use, safety and security incidents, inspection results, vendor performance, capital plans and sustainability. It is chaired by the Head of Facilities and includes the Chief People Officer (or delegate), the Head of IT / CISO (or delegate), a Compliance Officer representative, the Controller (or delegate), and two employee representatives from different departments who rotate annually. Minutes are kept for 7 years.
- **Health and safety committee.** Where state law requires a workplace safety committee, it is formed under the Safety and Security Lead; where it is not required, the Facilities & Workplace Committee acts as one, with employee representation.
- **Named site leads.** Each office has a named **Site Lead** (the Facilities Manager or Office Administrator) who is the first contact for the building landlord, security, emergencies and vendors. The list of Site Leads is on the Facilities Portal.
- **Delegation.** The Head of Facilities may delegate tasks in writing but remains accountable. The delegation list is reviewed annually.

Responsibilities

- **Head of Facilities:** keep this manual current; run the committee; ensure every office has a Site Lead, an emergency plan and trained wardens; report on safety and security.
- **Site Leads:** know the building, the landlord's rules and contacts, and the local emergency services; run local drills and inspections; keep site records.
- **Department Heads:** cooperate with space and safety planning and nominate wardens and first aiders.

1.2 Scope, Office Types and Service Standards

Purpose. To define what this manual covers and the standard of service employees can expect.

Policy

Office types. The manual applies to every space Simtora leases, owns, shares or occupies, as follows:

Type	Description	Typical services
Headquarters or hub office	A staffed office with reception, meeting rooms, a pantry, secure areas and an on-site Facilities Manager	Full services in Parts 2 to 7
Regional office	A smaller staffed office with an Office Administrator	Full safety and security; reduced amenities
Flex or shared space	Serviced or coworking space, executive suites or a temporary desk agreement	Landlord or operator provides most services; Simtora follows its own safety, security and data rules (7.1)
Remote employees' home offices	Not Company premises; supported through equipment, allowances and emergency notification	Parts 5.3, 6.8; HR 4.3 and 7.4
Meeting venues and events	Hotels, conference centers, customer sites	3.10

Service standards. Facilities aims to provide:

- Offices open for badge access from **6:00 a.m. to 8:00 p.m.** local time on business days, with reception staffed **8:00 a.m. to 5:30 p.m.** at hub offices.
- A clean, well-lit, comfortable environment with the environmental settings in Part 4.
- Working restrooms, pantries, meeting rooms and desks, with faults fixed within the service targets in Appendix A.
- Safety, security and emergency arrangements meeting this manual and the law.

Interpretation. Time periods in this manual are in **business days** unless the text says "hours" or "days." A "business day" is a Monday to Friday that is not a Company holiday (HR 6.1).

Responsibilities

- **Facilities** publishes the current list of offices, hours, contacts and services on the Facilities Portal.
 - **Employees** use the offices and services in line with this manual and take reasonable care of shared spaces.
-

1.3 Requesting Services: The Facilities Portal and Helpdesk

Purpose. To provide one clear route for requests, so that nothing is lost and every request has an owner and a target.

Policy

- **One front door.** All non-emergency requests (repairs, moves, supplies, badges, visitor pre-registration, room issues, ergonomic requests) are submitted through the **Facilities Portal** or the helpdesk address facilities@simtora.example. QR codes in meeting rooms and pantries open the portal with the location filled in.
- **Emergencies are not portal tickets.** In an emergency, call **911** first, then the site security or Facilities emergency number in Appendix C. Never wait for a ticket response in a life-safety situation.
- **Ticket handling.** Each ticket is acknowledged automatically, assigned an owner within **1 business day** (4 business hours for urgent items), updated when the status changes and closed with the requester's confirmation. The service targets are in Appendix A.
- **Priorities.**

Priority	Definition	Response target
P1 – Emergency or safety	Risk to life, injury, fire, flood, gas smell, security breach, loss of power or cooling in a secure area, unsafe structure	Immediate; Facilities responds within 15 minutes during business hours and within 1 hour after hours
P2 – Urgent	A fault stopping work for a team or affecting many people (no heating or cooling, no water, lift out of service, meeting room out for the day, badge system failure)	4 business hours
P3 – Standard	An individual fault or service request	2 business days
P4 – Planned	Non-urgent improvements, projects, moves and changes	Scoped and scheduled within 10 business days

- **After-hours issues.** For urgent building issues outside business hours, employees use the after-hours line in Appendix C; the on-call Facilities technician or building vendor acts.
- **Feedback.** Facilities surveys office users **at least twice a year** and sends a short satisfaction request on ticket closure. Results feed the committee (1.1).
- **Confidentiality of requests.** Requests involving accommodations, health information or lactation are visible only to Facilities staff who need to act on them and to HR. Health details are not recorded in tickets (3.3).

Responsibilities

- **Employees** submit clear requests with the location, what is wrong and how urgent it is.
- **Facilities** triages, communicates and closes tickets, and reports on service targets monthly (8.2).

1.4 Budget, Approvals and Spending Authority

Purpose. To make sure facilities spending is planned, approved and controlled.

Policy

- **Budget.** Facilities prepares its operating and capital budget in the annual budget cycle (Finance and Accounting Manual 8.1) with a plan for leases, services, maintenance, furniture, refresh, sustainability and safety upgrades. Variances above **10% of the approved line or \$25,000, whichever is smaller**, are explained to Finance (Finance and Accounting Manual 8.2).
- **Approval limits.** Facilities follows the delegation of authority in Finance and Accounting Manual 1.2, measured by total committed value over the term:

Total committed value	Approval
Up to \$5,000	Head of Facilities (as budget owner)
5,000.01to25,000	Department Head (Head of Facilities as the Facilities Department Head)
25,000.01to100,000	Head of Facilities and CFO
100,000.01to500,000	CFO and CEO
Over \$500,000	CEO and the Board (or a designated committee)

- **Real property.** Any sale or lease of real property needs Board approval, regardless of amount (Finance and Accounting Manual 1.2). Legal reviews every lease, extension, renewal and termination, and the Controller is told **before signing** (7.1).
- **Purchases.** A purchase order is required above 5,000 *
*; quotes and RFPs follow the Procurement Policy Manual (3.1). Fit — out and construction above * *100,000 need a formal RFP (Procurement 6.6).
- **No splitting.** Splitting a purchase to stay under a limit is a violation.
- **Petty cash.** Facilities may hold an office petty-cash float of up to 500 * *, with * *75 per transaction, for building supplies, held by a named custodian under the rules in Finance and Accounting Manual 4.9. The float is for small urgent needs only; it is not for assets, regular suppliers or gifts.

- **Cost allocation.** Facilities and office costs are allocated to departments by headcount and occupied space (Finance and Accounting Manual 8.4).
- **Requests from departments.** Space, furniture and layout requests from a department are approved by the Department Head and assessed by Facilities against the space plan (3.1) and budget. Unbudgeted work is treated as a change under the budget rules.
- **Emergency spend.** Emergency repairs to protect people or property may proceed on the verbal approval of the Head of Facilities up to their limit, the CFO above 25,000 * *and the CEO above* * 100,000, documented within **1 business day** (Procurement Policy Manual 3.8).

Responsibilities

- **Head of Facilities:** stay within budget; ensure approvals are in the system; report variances.
 - **Controller and Finance:** confirm budgets, capitalization and lease accounting.
-

1.5 Exceptions to This Manual

Purpose. To allow flexibility where a rule does not fit a real situation, without weakening safety, security or the law.

Policy

- Exceptions must be **requested in writing** through the Facilities Portal or by email to the Head of Facilities, with the reason, the risk, any compensating controls and the period (**maximum 12 months**).
- **Who approves.** The Head of Facilities approves exceptions to operational rules. The CISO must also approve any exception affecting secure areas or IT areas (2.4). The **Chief People Officer** must also approve exceptions affecting health, safety or employee privacy. The **General Counsel** must also approve any exception relating to a legal requirement. Exceptions that touch a Finance approval or Procurement rule need that owner's approval as well.
- **No exceptions** are allowed to: minimum life-safety requirements (exits, alarms, wardens, first aid), non-retaliation for safety reports, privacy limits on cameras (2.5),

accessibility duties, or any legal requirement.

- Exceptions are **logged** by Facilities, reviewed at each committee meeting and expire automatically unless renewed.
 - Emergency departures are permitted to protect life, and are reported to the Head of Facilities within **1 business day**.
-

1.6 Non-Compliance and Raising Concerns

Purpose. To make sure problems are reported and corrected fairly.

Policy

- **Report concerns.** Employees should report a safety hazard, security lapse, misuse of Company space or assets, or a breach of this manual to their manager, Facilities, HR or the Compliance Officer. Concerns may also be raised through the **Ethics Line** (ethics@simtora.example, anonymous reports accepted) or to audit@simtora.example (Audit Committee) as described in the Code of Ethics and Compliance Manual (2.1). Reports are acknowledged within **5 business days**.
 - **Non-retaliation.** Nobody will be disadvantaged for a good-faith report of a safety hazard, injury, security concern or breach. Employees may also contact OSHA or the relevant state agency and this manual never limits that right (HR 4.3; Code of Ethics and Compliance Manual 2.3, 2.5).
 - **Corrective action.** Deliberate or repeated breaches (for example, propping a fire door open, lending a badge, bypassing access controls, tampering with fire equipment) follow HR Policy Manual 2.3. A first accidental or minor lapse is normally handled by coaching. **Simtora does not charge employees for lost badges, keys or normal wear, and does not deduct from wages** for badges or equipment; recovery of any Company property follows HR 7.4 and lawful process only.
 - **Vendors and visitors.** Vendors who breach safety or security rules may be removed from the premises and face contract remedies (Part 7). Visitors may be asked to leave.
 - **Escalation.** Facilities issues that cannot be resolved locally escalate: Site Lead → Head of Facilities → CFO → CEO. Safety and security issues may go directly to the Chief People Officer or CEO.
-

Part 2 – Physical Security and Access Control

2.1 Security Principles and Zones

Purpose. To protect people, customer and Company information and assets with physical security that is effective but not intrusive.

Scope. All Simtora offices and any space where Simtora equipment or information is kept.

Policy

- **Layers.** Security works in layers: the building perimeter and landlord controls, the Simtora entrance and reception, floors and work areas, and secure areas. No single control is relied on alone.
- **Zones.** Each office is divided into zones:

Zone	Description	Who may enter
Zone 1 – Public	Building lobby, shared corridors, landlord areas	Anyone the building admits
Zone 2 – Reception and Guest	Simtora reception, visitor waiting area, guest meeting rooms	Employees, registered visitors
Zone 3 – Work areas	Open floors, team rooms, pantries, standard meeting rooms	Badge-holders; visitors only when escorted
Zone 4 – Secure areas	Network rooms and closets, on-premises lab or test equipment, spare-device storage, HR and Finance file rooms, records rooms	Named, authorized people only (2.4)

- **Least privilege.** Access is given by role and need, reviewed regularly and removed promptly. Nobody has access "just in case."
- **Consistency with IT.** The IT Policy Manual (5.3) governs technical and environmental protection of IT areas; this manual governs the doors, locks, cameras, visitors, guards and buildings around them. Where they meet, the stricter rule applies.
- **Privacy and legal limits.** Security measures follow federal, state and local law, including laws on biometrics, recording, employee monitoring and disability access. Security will not be used to interfere with lawful, protected activity, such as employees talking about pay or working conditions, or reporting to a government agency (Code of Ethics and Compliance Manual 2.5).
- **Security risk assessment.** The Safety and Security Lead assesses each office **at least annually** and before opening, moving or changing an office. The assessment covers entrances, blind spots, lighting, valuables, deliveries, neighborhood crime and emergency response times, and is reported to the committee.

Responsibilities

- **Facilities** sets up and maintains access, camera and visitor systems, tests them and keeps records.
 - **CISO** sets the security requirements for Zone 4 areas that hold IT equipment.
 - **Everyone** follows the rules and reports concerns.
-

2.2 Badges and Access Credentials

Purpose. To make sure only the right people enter Simtora spaces, and that credentials are issued, used and removed properly.

Scope. All employees, contractors, agency workers and long-term vendors who need regular building access.

Policy

Issuance

- Every employee is issued a **Simtora badge** on the **first day of work** (HR onboarding). The badge is a photo ID and an electronic access card. The employee acknowledges

responsibility for the badge in the onboarding acknowledgement.

- **Contractors and agency workers** working on-site for more than 5 business days are issued a badge of a **different color** with an **expiry date** matching their engagement (never more than **90 days**, renewable; consistent with Procurement Policy Manual 6.3). Access is limited to what the engagement requires.
- **Badge photos and data.** A photograph is used for identification only. Badge data is not used for timekeeping, discipline or attendance monitoring without HR and Legal review, and is used to trace movement only to investigate a security or safety incident.
- **Remote employees** who visit an office are issued a temporary badge for the visit on their manager's pre-registered request.

Wearing and using badges

- Inside Simtora premises (Zones 3 and 4), wear the badge **visibly** on a lanyard or clip, or carry it ready to show. Remove it outside the office to reduce the risk of loss or targeting.
- **Badge in individually.** Do not hold doors for people you do not know, and do not allow "tailgating" through controlled doors. Politely direct visitors to reception. Anyone without a badge and without an escort should be asked to go to reception or reported to Facilities.
- **Do not lend, copy or share** a badge, PIN or access code. Do not prop open secured doors. PINs are personal and are not written down or shared.
- **Biometric access.** Simtora does **not** use fingerprint, retinal, facial or other biometric access controls unless the Head of Facilities, the CISO and the General Counsel first approve in writing after a privacy and legal review (including state biometric-privacy laws), and affected employees receive written notice and any required consent. An equally secure non-biometric alternative must be offered.

Lost, stolen or damaged badges

- Report a **lost or stolen badge immediately** to Facilities Security (Appendix C) or through a P1 ticket. Facilities **deactivates the badge within 15 minutes** of the report during business hours and **within 1 hour** at other times, and issues a temporary badge valid for at most 3 business days.
- If a badge is lost or stolen along with a laptop or other device, the employee also reports to **IT Security within 1 hour of discovery** (IT Policy Manual 2.2, 7.4).

- **Replacement.** Badges are replaced **free of charge**. Simtora does not charge employees for lost, damaged or unreturned badges and never deducts any amount from pay for them. Repeated or deliberate loss or sharing of credentials may lead to corrective action (HR 2.3).

Return and deactivation

- **Leavers.** IT and Facilities deactivate a departing employee's badge at the **end of their last day**, and **immediately** for involuntary separations, in line with IT Policy Manual 3.3 and HR 9.4. The employee returns the badge on their last day or by prepaid shipping within **7 days** (HR 7.4).
- **Movers.** When someone changes team or role, their access is updated within **2 business days** (IT Policy Manual 3.3).
- **Dormant badges** unused for **60 days** are reviewed by Facilities and suspended unless the manager confirms need.

Access levels and reviews

- **Access groups** are built by role (for example, general employee, IT, Facilities, HR/Finance file room, executive). Changes need a ticket approved by the manager and, for Zone 4, by the area owner (2.4).
- **Quarterly**, the badge administrator produces a report of all active badges, and Site Leads check it against HR's list of current employees and contractors. **Every 6 months**, Facilities and IT review Zone 4 access lists (IT Policy Manual 5.3). Errors are corrected within **2 business days**.

Responsibilities

- **Employees:** wear and protect the badge; report loss immediately; return it on leaving.
- **Managers:** request and confirm access; tell Facilities and HR of changes.
- **Facilities:** issue, review and deactivate badges; keep the badge system secure and backed up.
- **HR and IT:** trigger issuance and removal in the joiner, mover and leaver process.

2.3 Visitors and Guests

Purpose. To welcome visitors safely while protecting people, confidential information and secure areas.

Scope. Every person who is not a badge-holder: customers, candidates, partners, vendors, delivery staff, friends and family, government representatives.

Policy

Pre-registration

- Hosts **pre-register** visitors in the **Visitor Management System (VMS)** or through the Facilities Portal at least **4 business hours** before arrival, and **1 business day** before for groups of more than 10, customers visiting secure or lab areas, or any visit outside normal hours. Required fields are in Appendix B. Hosts collect only the details needed. **Simtora does not require or store date of birth, national ID numbers or copies of government IDs for ordinary visits.**
- **Walk-in visitors** are asked at reception to contact the person they are visiting, who confirms the visit before entry. If the host cannot be reached, the visitor waits in reception or is asked to reschedule.

Check-in

- Visitors sign in at reception. Reception **confirms identity** by asking the visitor to state their name and organization and, for visitors unknown to the host or who will have access to Confidential information, by viewing a photo ID **without copying it**. Visitors who refuse to identify themselves are not admitted.
- The VMS prints a **visitor badge** showing name, host, date and expiry. Visitors wear it visibly and return it on leaving. Visitor badges are a different color from employee badges.
- **Non-disclosure.** Visitors to work areas, labs or technical meetings, or to customer-confidential settings, accept the **electronic NDA** in the VMS (Legal's template) before entry. Candidates, delivery personnel and family or friends visiting reception briefly do not need an NDA and are not shown Confidential material. Hosts must not share Confidential or Restricted information with a visitor without an NDA or a written contract term that covers it (IT Policy Manual 2.1).

Escorting and conduct

- **Visitors are escorted by their host** (or a designated colleague) at all times in Zones 3 and 4. Visitors are **not allowed** in Zone 4 unless the area owner and the CISO authorize it in advance in writing, for a specific purpose and time, with a named escort present throughout.
- **Guest network only.** Visitors use the **guest Wi-Fi**, which is separated from Company systems (IT Policy Manual 5.1). They may not connect devices to the Company network or plug unknown USB devices into Company equipment.
- **Screens and whiteboards.** Hosts lock screens, close confidential documents and clear whiteboards before visitors enter a room (IT Policy Manual 4.7).
- **Photography and recording.** Visitors may not photograph or record in work areas without the host's permission (and Facilities' permission for filming).
- **Unescorted visitors.** Anyone who sees an unescorted visitor politely asks who they are visiting and accompanies them to reception or calls Facilities. Do not confront someone who appears threatening; call security.
- **Visitor behavior.** Visitors follow Simtora rules on safety, conduct, harassment and smoking (HR 4.2, 4.3; smoke- and vape-free within 25 feet of entrances) and may be asked to leave if they do not.

Special groups

- **Candidates.** HR's recruiter is the host. Candidates are met at reception, escorted and not left alone in work areas.
- **Contractors and delivery personnel.** Regular vendors on premises follow 7.4 and Appendix I. Delivery drivers are met at reception or the loading area and go no further without an escort.
- **Children and family.** Employees may bring family for brief social visits to reception or the pantry on the host's responsibility, with prior notice to Facilities. Children stay with the host and out of Zone 4, labs and any area with a physical hazard. Family events are organized by HR with Facilities.
- **Customers and partners.** Customer visits are pre-registered, covered by the appropriate NDA, escorted and hosted in guest rooms.
- **Government or law-enforcement visitors.** Follow 2.8.
- **Accessibility.** Reception asks in advance whether any visitor needs accessible arrangements (for example, step-free access, a sign-language interpreter, quiet space, a service animal), and Facilities provides them.

Records

- The VMS records name, organization, host, date and time, and NDA status. **Visitor logs are kept for 12 months** (longer only under a legal hold or customer contract) and then deleted. Access is limited to Facilities, IT Security and Legal. Logs are used for safety (for example, evacuation accounting), security and investigation, not marketing.
- **Evacuation accounting.** Reception (or the Site Lead) can produce a **real-time list of visitors on site** for wardens in an emergency (6.2).

Responsibilities

- **Hosts:** pre-register, meet the visitor, escort them, ensure the NDA is signed, and see them out.
 - **Reception and Office Administrators:** check in, badge and log visitors; contact hosts; keep the visitor system working.
 - **Legal:** maintains the electronic NDA and visitor terms.
 - **Safety and Security Lead:** audits visitor practices quarterly.
-

2.4 Secure Areas: Network Rooms, Labs and Storage

Purpose. To protect the small amount of technology and sensitive material Simtora keeps on site. Most production runs in the cloud, so secure areas are mostly network rooms and closets, small on-site labs or test benches, spare-device storage and file rooms.

Scope. All Zone 4 areas. IT-specific requirements are in IT Policy Manual 5.3; this section provides the physical controls.

Policy

- **Designation.** IT and Facilities together designate Zone 4 areas. Each has a named **area owner** (for example, the Head of IT for network rooms, the Chief People Officer for HR files, the Controller for finance records) and signage.
- **Locks and access control.** Zone 4 doors lock with **badge access**, plus a PIN or second factor (a key in a locked, logged key box, or a hardware token) for **network rooms with production-relevant equipment and rooms holding Restricted data**. Doors close and lock automatically. Biometric scanners are not used unless approved under 2.2.

- **Access lists.** Only people who need access for their role are on the list, approved by the area owner and, for IT areas, the CISO. The list is reviewed **every 6 months**, and access is removed **on the day** someone leaves or no longer needs it (IT Policy Manual 5.3).
- **Two-person rule for highly sensitive rooms.** For designated rooms holding key infrastructure (for example, a core network room or a room holding hardware security modules), **two authorized people** must be present for maintenance that can affect services, or one person may enter under a logged ticket with a live camera view. The area owner sets which rooms are covered.
- **Logs.** All entries to Zone 4 areas are logged electronically. IT Security and Facilities review logs **monthly**, and **weekly** for areas holding Restricted data. Anomalies (entries at unusual hours, repeated failed attempts, propped doors) are investigated within **2 business days**, and serious ones are handled as security incidents (2.9).
- **Emergency access.** Emergency keys or override codes are held in a sealed, tamper-evident container by the Head of IT and the Head of Facilities. Use triggers an alert, is documented within **1 business day** and is reviewed by the CISO and reported to the committee.
- **Visitors and vendors.** Visitors and vendors enter only with an authorized escort present throughout (2.3, 7.4) and sign the visit log. **Cleaning staff do not enter network rooms or locked file rooms** unless scheduled and escorted (7.3).
- **Housekeeping.** No food, drink, smoking, vaping or unauthorized storage in Zone 4 rooms. No cardboard, combustibles or clutter in network rooms. Racks are locked where practical, and cables are labeled and tidy.
- **Deliveries.** Equipment for Zone 4 is received in the staging area (5.2), not left in corridors.
- **Environmental protection.** Temperature, humidity, water-leak and power monitoring follow 4.5 and IT Policy Manual 5.3.
- **Documents and media.** Confidential and Restricted paper goes in locked cabinets or shred bins (IT Policy Manual 2.4, 4.7). Storage for spare devices is locked and inventoried.
- **Customer-required controls.** Physical controls required by a customer contract (for example, enhanced logs) are agreed with the CISO and Legal before signing and maintained by Facilities.

Responsibilities

- **Area owners:** approve access, review lists and ensure rules are followed.
 - **Facilities:** provide and maintain physical controls and logs.
 - **CISO and IT Security:** set requirements, review logs and investigate incidents.
-

2.5 Video Surveillance (CCTV) and Monitoring

Purpose. To deter and investigate theft, unauthorized entry and safety incidents while respecting employee and visitor privacy.

Scope. Cameras and recording systems in and around Simtora offices and any Company-controlled parking. This section is the notice of video surveillance; it is repeated in onboarding materials and by signs at entrances.

Policy

- **Where cameras are used.** Cameras may cover **entrances and exits, reception, loading and delivery areas, corridors and stairwells, the approach to and interior of secure areas, and parking**, for security and safety only.
- **Where cameras are never used.** Cameras are **not** installed in **restrooms, changing areas, lactation rooms, wellness or quiet rooms, or pantries and break areas**, and are not aimed at individual desks or screens, or at whiteboards or documents.
- **No audio.** **Audio recording is turned off** on all cameras and door stations. Facilities does not use hidden cameras. Covert surveillance needs the General Counsel's prior written approval for a specific, lawful investigation.
- **Signage.** Signs at each entrance state that video surveillance is used. Legal adds any notices state law requires.
- **Purpose limits.** Footage is used only for security, safety, incident and legal purposes. It is not used to measure productivity, attendance or working hours, or to monitor union or other protected activity, and it supports discipline only where a security, safety or conduct issue is involved and HR and Legal have approved.
- **Retention.** Footage is stored on secure, encrypted, access-logged systems for **30 days** and then overwritten automatically, unless a copy is preserved for an incident, investigation, claim or legal hold. Preserved footage is deleted when the matter ends.

- **Who may view.** Live and recorded footage may be viewed only by the **Safety and Security Lead**, the **Head of Facilities** and the **CISO** (or their designees), **for a documented purpose**. Viewing by anyone else (for example, HR or a manager) needs a **written request** stating the reason, approved by the **General Counsel and the Chief People Officer** (or by the CISO with Legal for a security incident). Requests and approvals are logged, consistent with IT Policy Manual 4.8. Access without approval is a serious breach.
- **Release outside Simtora.** Footage goes to police or other authorities, or in response to a subpoena, only through **Legal** (2.8). Legal decides on requests from individuals and may require other people to be blurred.
- **Systems security.** Camera systems sit on a separate network, are patched, use unique credentials with MFA for administrators and are configured by IT Security. Default passwords are changed at installation. System access logs are kept for **12 months**.
- **Privacy review.** New cameras or monitoring technology (occupancy sensors, badge analytics, people-counting) need review by Facilities, IT Security, HR and Legal. **Occupancy and desk sensors** count use without identifying individuals; data is aggregated for space planning and not used to monitor individuals.
- **State law.** Where state or local law adds notice, consent or retention rules for video or electronic monitoring, Legal ensures compliance, consistent with HR 1.9 and IT Policy Manual 4.8.

Responsibilities

- **Facilities:** operate cameras, enforce access rules and log viewing.
 - **Legal and HR:** approve non-routine access and any release.
 - **IT Security:** secure the systems.
-

2.6 After-Hours Access, Lone Working and On-Call Staff

Purpose. To let people work outside core hours safely, particularly the on-call teams (Site Reliability Engineering, Support and Security), without creating undue risk.

Policy

- **Standard access hours** are 6:00 a.m. to 8:00 p.m. local time on business days. Outside those hours, and on weekends and holidays, entry is by badge with **after-hours registration** through the portal, unless the badge is authorized for after-hours use.
- **On-call teams.** Employees on a rotation who may need an office (for hardware, lab or network work) receive **standing after-hours access** for the rotation, approved by their Department Head and Facilities and reviewed **quarterly**.
- **Lone-working safeguards.** Where practical, avoid working alone in an office at night. Anyone who will be alone in an office **between 8:00 p.m. and 6:00 a.m.** should:
 - tell their manager or the on-call lead;
 - use a **check-in** (a message to the on-call lead on arrival and on leaving; if none arrives in the agreed time, the lead calls and, with no answer, contacts building security or emergency services);
 - use well-lit exit routes rather than empty stairwells; and
 - ask Facilities for an escort to a vehicle or transport where a guard is on site.
- **High-risk tasks.** Nobody works alone on tasks with physical risk (lifting heavy equipment, work at height, electrical panels).
- **Vendors after hours.** Vendors working outside hours are supervised through the badge system and follow 7.3 and Appendix I.
- **Lock-up.** The last person leaving a small office confirms doors are secure and nothing is propped open. Hub offices are locked by the security vendor or building staff on a schedule.
- **Home and remote work.** Working alone at home is covered by HR 4.3, not this manual.

Responsibilities

- **Managers and on-call leads:** arrange check-ins and approve standing access.
 - **Facilities:** set up access, review logs and arrange escorts.
-

2.7 Security Personnel, Reception and Package Screening

Purpose. To set standards for the people who provide security and reception services.

Policy

- **Reception.** Hub and regional offices have staffed reception during the hours in 1.2, or a virtual reception process (visitor tablet plus remote assistance) for smaller offices. Receptionists are trained on visitor procedures, emergencies and the government-visit rules in 2.8 (see 8.3).
- **Guards.** Guards, whether provided by Simtora or the landlord, must be **licensed as state law requires**, employed by a vendor sourced through the Procurement framework (7.2), background-checked by the vendor in compliance with the Fair Credit Reporting Act and state law, trained on Simtora post orders and insured (Procurement Policy Manual 6.6). **Post orders** set duties, patrols, incident reporting, use-of-force limits and communications. Guards do not search employees or their belongings except as post orders and the law allow.
- **Package and mail screening.** Facilities checks packages at reception or the mailroom for warning signs (unknown sender, unexpected item, excessive tape or weight, stains, powder, wires) and does not open suspicious items. A suspicious package is left in place, the area is cleared and 911 is called (6.6).
- **Deliveries.** Deliveries are met at reception or the loading area. Food deliveries wait at reception for the employee to collect. Couriers do not walk through work areas unescorted.
- **Search of property.** Simtora does not routinely search personal belongings. Where there is a clear, lawful need (for example, a specific, reasonable suspicion of theft or a safety threat), a search may be carried out only with **HR and Legal approval**, by two people, respectfully and consistently with state law. Nobody is touched or strip-searched, and an employee who declines is referred to law enforcement where appropriate rather than searched by force.

Responsibilities

- **Facilities:** manage guard and reception vendors; review reports monthly.
 - **Reception and guards:** follow post orders and report incidents.
-

2.8 Government Visits, Search Warrants and Law-Enforcement Requests

Purpose. To make sure reception and site staff know how to respond calmly and lawfully to a visit from a government agent, in line with Code of Ethics and Compliance Manual 6.6.

Scope. Any visit to a Simtora office by a government official, police officer, regulator, inspector or agent (for example, OSHA, a fire marshal, immigration, FBI, IRS or state agencies) and any request by them for access, documents or people.

Policy

1. **Be courteous.** Greet the visitor politely, **ask for identification and a business card**, and ask the purpose of the visit. Do not obstruct.
2. **Call Legal at once.** Reception or the Site Lead calls the General Counsel (or Legal's on-call contact in Appendix C) **immediately and within 1 hour at the latest**, and asks the visitors to wait in reception or a guest room. Legal or outside counsel attends where possible. The Compliance Officer is informed.
3. **Search warrants.** Ask for and read the warrant, copy or photograph it, and note names and agencies. **Do not consent to a search broader than the warrant authorizes.** Do not interfere, and never hide, delete or destroy anything. Legal or outside counsel handles the search.
4. **Routine inspections.** Fire, building, health and OSHA inspectors usually arrive with notice. Facilities and Legal are called, the Site Lead escorts the inspector, and a note is kept of who attended, what was inspected and any findings. Requests for records go to Legal.
5. **Immigration and other enforcement officers.** Staff do not consent to entry into non-public areas without a judicial warrant or Legal's advice. Reception asks for any warrant and calls Legal at once.
6. **Footage, badge logs and visitor logs.** Only Legal releases them (2.5).
7. **Record.** The Site Lead notes times, people, requests and what was said, and gives the notes to Legal. Legal logs and reports these visits (Code of Ethics and Compliance Manual 6.6).

8. **Employee rights.** Employees may speak to government agents and may not be told not to, and they may ask for counsel. Simtora does not retaliate against lawful cooperation (Code of Ethics and Compliance Manual 2.5, 6.6).

Responsibilities

- **Reception and Site Leads:** follow the steps and call Legal.
 - **Legal:** direct the response, log matters and inform the CEO and Audit Committee as required.
-

2.9 Security Incidents, Lost Badges and Theft

Purpose. To respond quickly and consistently to security events.

Policy

- **What to report.** Report at once to Facilities Security (Appendix C): tailgating, unauthorized persons, forced or damaged doors, lost keys or badges, theft or missing equipment, suspicious behavior, threats, vandalism, tampering with cameras or locks, suspicious packages and any breach of a secure area.
- **Response.** Facilities and the Safety and Security Lead make the area safe, call 911 for any immediate risk, protect evidence (do not touch or clean), preserve footage and access logs (2.5), notify the relevant owner and create an incident record (Appendix H) within **1 business day**.
- **Escalation timescales.** Serious incidents (injury, weapons, forced entry to a secure area, theft of IT equipment that holds data, threats) are reported to the Head of Facilities and the CISO **within 1 hour**, and to the Chief People Officer, General Counsel and CEO **within 24 hours**. Where information may be affected, the security incident process in IT Policy Manual 7.4 also applies.
- **Stolen equipment.** Lost or stolen devices are reported to **IT Security within 1 hour of discovery** (IT Policy Manual 2.2). Facilities helps with police reports, insurance and register updates (Finance and Accounting Manual 6.6, 7.2). Employees are not charged for lost or stolen equipment.
- **Personal property.** Simtora is not responsible for personal belongings but offers lockers or lockable storage where possible and helps employees report thefts to

police.

- **Review.** Security incidents are reviewed within **10 business days** with a short root-cause note and logged corrective actions. Employee-conduct matters go to HR. Use of footage or logs follows 2.5 and IT Policy Manual 4.8.
- **Trends.** The committee reviews security incident trends quarterly.

Responsibilities

- **Everyone:** report suspicious or unsafe activity.
 - **Facilities:** respond, log and improve.
 - **Legal and HR:** advise on evidence, employee issues and reports to authorities.
-

Part 3 – Workplace Operations and Amenities

3.1 Hybrid Space Planning and Desk Booking

Purpose. To provide the right amount of space for a hybrid workforce and make it easy to find a place to work.

Scope. Desks, team areas and workspace booking at all Simtora offices.

Policy

Hybrid model. The default is hybrid: employees work from an office on the **anchor days (Tuesday, Wednesday and Thursday)** and a **minimum of 3 days per week**, unless approved as fully remote (HR 5.2). Space is planned on this basis.

Planning

- **Space plan.** Facilities and HR plan space using aggregated badge counts, booking data, headcount and team plans. The target is to seat **at least 85% of expected attendance on the busiest anchor day**, plus visitors and growth. Facilities reports peak

and average occupancy to the committee quarterly. Data is used in aggregate; space data is not used to monitor individual attendance (2.5).

- **Neighborhoods.** Teams are assigned a **neighborhood** of shared desks and collaboration areas so that people who work together sit together.
- **Assigned desks.** Assigned desks are the exception, for roles with fixed equipment (for example, hardware or lab engineers), approved accommodations under HR 4.1, and a small number of leaders. Requests are approved by the Department Head and Facilities and reviewed annually.

Desk booking

- **Booking.** Employees book desks in the **workplace booking tool** (integrated with the calendar) **up to 10 business days ahead**, or the same day, subject to availability. Team leads may book desk blocks for team days up to **15 business days** ahead.
- **Check-in and release.** Employees check in through the app or desk sensor. A desk not checked in **within 60 minutes** of the booking start is released. Cancel a desk you will not use as soon as you know.
- **Unbooked seating.** Unbooked desks and collaboration benches are first-come, first-served, with a **2-hour limit** if others are waiting.
- **Full days.** If desks are full on an anchor day, priority goes to teams with a scheduled in-person event, then by booking time. Facilities publishes forecasts so that managers can stagger attendance.
- **Clean and tidy.** Clear the desk when you leave and follow the clear-desk and lock-screen rules (IT Policy Manual 4.7).
- **Personal items.** Shared desks are not for storage. Use a **locker** (booked by the day or week). Items left overnight on shared desks are held **10 business days** and then donated or discarded.
- **Workstation changes.** Employees may adjust chairs and sit-stand desks but do not move furniture, disconnect Company equipment or swap peripherals belonging to others. Ergonomic help is in 5.4.
- **Fully remote employees** who visit book a desk like anyone else.
- **Visitors** sit only in guest zones or with their host on a booked desk.

Responsibilities

- **Facilities:** provide the booking system, plan space, report occupancy.

- **Managers:** coordinate team days.
 - **Employees:** book, check in, cancel and leave desks clean.
-

3.2 Meeting Rooms and Collaboration Spaces

Purpose. To make shared meeting spaces available and effective.

Policy

- **Booking.** Rooms are booked through the **calendar integration**. Rooms are categorized by size: huddle rooms (2 to 4 people), standard rooms (6 to 8) and large rooms (12 or more), plus **guest rooms** near reception for external meetings and **focus rooms** for quiet work.
- **Advance booking.** Employees may book rooms **up to 30 days ahead**; recurring bookings are limited to **3 months** and reviewed each quarter.
- **Executive and board rooms.** The boardroom and executive conference room have priority booking for the CEO, the Executive Team, and Board and All-Hands meetings. If a priority booking displaces another, Facilities gives the organizer **at least 24 hours' notice** where possible and helps find an alternative.
- **No-shows.** A booking is **released automatically** if nobody checks in **within 10 minutes**. Repeated no-shows are reported to managers.
- **Right-size.** Do not book a large room for a small meeting when a smaller one is free.
- **Finish on time.** End meetings 5 minutes before the hour, and leave the room tidy: furniture in place, whiteboards erased (IT Policy Manual 4.7 requires Confidential content to be erased), cups and food removed.
- **Video etiquette.** Arrive early to test equipment, mute when not speaking, do not move fixed cameras or microphones and report faults by the QR code in the room (4.4).
- **Confidential meetings.** For sensitive meetings (HR, legal, financial, customer-confidential), book a room with a door that closes, and check nobody can overhear.
- **Guest rooms** are for external meetings first and kept presentable. Visitors are escorted to them.
- **Hybrid meetings.** Rooms are equipped so remote participants can see and hear everyone in the room; Facilities and IT publish simple guidance.

- **Walls and glass.** Do not use adhesives or nails on walls or glass.

Responsibilities

- **Organizers:** book the right room, cancel unused bookings and leave rooms tidy.
 - **Facilities and IT:** maintain rooms and technology.
-

3.3 Accessibility, Accommodations and Inclusive Facilities

Purpose. To make sure people of all abilities can enter, move around and use Simtora's spaces, and to deliver workplace accommodations promptly.

Scope. All offices, facilities services and events. This section supports HR Policy Manual 4.1.

Policy

- **ADA and state law.** Simtora complies with the Americans with Disabilities Act (ADA) and state and local accessibility laws. New offices, renovations and events are checked for accessibility (routes, entrances, restrooms, doors, meeting rooms, signage, parking, emergency egress) **before opening**, and existing offices **at least every 3 years**, against the 2010 ADA Standards for Accessible Design and local codes.
- **Clear routes.** Keep accessible routes, aisles and exits clear. Do not block ramps, accessible restrooms, doors or elevators.
- **Accommodations.** Requests for workplace changes because of disability, pregnancy or related conditions, religion or lactation go to HR under HR 4.1. HR decides the accommodation through the interactive process. **Facilities implements the physical accommodation** (for example, an accessible or assigned desk, height-adjustable furniture, a different location, lighting or noise adjustments, accessible parking) **within 5 business days** of HR's notice, or sooner where safety is at issue, and tells HR if a delay is unavoidable. **Medical information is not entered in Facilities tickets**; HR tells Facilities only what is necessary to act.
- **Service animals.** Trained service animals are welcome wherever employees and visitors are, as the ADA and state law require. Staff do not ask about a person's disability. Other animals are handled through HR 4.1.

- **Evacuation assistance.** Employees who may need help in an evacuation can ask HR or Facilities, in confidence, for a **personal emergency evacuation plan** (route, buddy, evacuation chair or refuge area). Plans are shared only with those who need them and reviewed **annually and on any change** (6.2).
- **Communication access.** Facilities and HR arrange sign-language interpretation, captioning, large print or accessible documents for meetings and events on request, with **5 business days' notice** where possible. Event invitations ask about access needs (3.10).
- **Inclusive facilities.** Where the building allows, offices provide **all-gender or single-occupancy restrooms**, and employees may use the restroom that matches their gender identity (HR 4.1). Hub offices provide a quiet room (3.4). Signage is plain-language and, where required, includes braille.
- **Sensory needs.** Hubs offer a mix of quiet, focus and collaboration areas. Noise and lighting concerns are handled under 3.7 and 4.3.
- **Tools.** The Facilities Portal and booking tools should meet accessibility standards; this is checked when they are selected (Procurement Policy Manual 6.1).
- **Concerns.** Barriers may be raised with Facilities, HR, the Compliance Officer or the Ethics Line. Retaliation is prohibited (1.6).

Responsibilities

- **HR:** owns the interactive process and accommodation decisions.
- **Facilities:** delivers, tracks and maintains physical accommodations and accessible features.

3.4 Lactation, Wellness and Quiet Rooms

Purpose. To provide private, comfortable rooms for lactation, rest and prayer or reflection, and to comply with federal and state law.

Policy

- **Lactation rooms.** Each hub and regional office has at least one **lactation room** that is **not a restroom**, shielded from view, free from intrusion and lockable from inside. It has a comfortable chair, a table or surface, an outlet, hand-washing facilities nearby,

and a refrigerator in or near the room. It is cleaned daily and shows when it is in use. There is **no camera** in the room (2.5).

- **Booking and break time.** Rooms are bookable with priority for lactation, and employees need not say why they are booking. Employees receive reasonable break time to express milk for the period the PUMP for Nursing Mothers Act and state law provide (HR 4.1). Managers must not obstruct breaks.
- **Flex and shared space.** Facilities confirms in the lease or agreement that a lactation room is available or arranges private space, and tells employees before they arrive.
- **Quiet rooms.** Hub offices provide a **quiet room** for prayer, meditation, rest or short wellness needs (for example, taking medication or recovering from a headache), open to people of any faith or none, subject to booking and no long-term occupation. It is not a sick bay; employees who are ill go home or seek care (HR 4.3). Religious accommodations are handled under HR 4.1.
- **Upkeep.** Facilities checks these rooms daily.

Responsibilities

- **Facilities:** provide, equip and clean rooms and keep them free of cameras and interruptions.
 - **Managers:** support the use of these rooms and breaks.
-

3.5 Office Supplies and Consumables

Purpose. To provide the supplies people need while controlling cost and waste.

Policy

- **Standard supplies** (pens, paper, notepads, markers, staples, tape, batteries, common cables and chargers) are stocked on each floor and free for business use.
- **Specialized items.** Keyboards, mice, headsets and monitors come through IT under IT Policy Manual 2.2 and 4.2 (or, for remote employees, the HR home-office allowance, HR 7.4). Other special items are requested through the portal and delivered within **2 business days**.

- **Ordering.** Supplies come from the **Facilities preferred-vendor catalog** and framework agreements (Procurement Policy Manual 6.2, 6.6). The Office Administrator does a **weekly stock check on Fridays** and reorders at the reorder level; catalog reorders are pre-approved within budget. Purchases above **\$5,000** follow 1.4.
- **Cards and petty cash.** Small unplanned supplies may be bought with the Company card or the office petty-cash float within Finance and Accounting Manual 4.6 and 4.9. Taking supplies home for personal use is not allowed.
- **Sustainable choices.** Facilities prefers recycled-content paper, refillable products and low-packaging goods and reduces printing (6.9).
- **Branded items.** Business cards and swag are ordered through Marketing under the Procurement manual, not through Facilities supplies.
- **Misuse.** Suspected misuse is handled first by conversation; deliberate theft may lead to corrective action (HR 2.3).

Responsibilities

- **Office Administrators:** maintain stock, order and control costs.
 - **Employees:** use supplies responsibly.
-

3.6 Pantries, Meals and Food Safety

Purpose. To provide clean, safe, inclusive food and drink facilities.

Policy

Pantries

- Each office has a pantry with drinking water, coffee and tea, a refrigerator, a microwave, dish-washing facilities and recycling and compost bins where local service exists (6.9).
- **Snacks and drinks** are restocked **on Monday and Thursday mornings** at hub offices, with healthy options and, where reasonable, vegetarian, vegan, gluten-free, nut-free and dairy-free choices, and allergens labeled.
- **Coffee machines** are cleaned and descaled **weekly** by Facilities or the vendor. Users empty drip trays and report faults.

- **Refrigerators.** Label items with name and date. Facilities **cleans out refrigerators every Friday at 5:00 p.m.** and discards perishable items (items in marked "Do not discard" bins are kept one week). **Simtora is not responsible for personal food left behind.** Refrigerators are kept at **40°F (4°C)** or below and checked weekly.
- **Kitchen safety.** Do not leave cooking unattended, and do not use personal appliances with heating elements. Report spills, breakage and hygiene issues promptly.

Meals and catering

- **Catered lunches** are provided **Tuesdays and Thursdays** at hub offices, served **12:00 p.m. to 1:30 p.m.**, with unclaimed food removed at **2:00 p.m.** Meals are a Company benefit. The Head of Facilities may adjust the pattern for cost or attendance with CFO approval; regional offices receive a comparable arrangement where size allows.
- **Dietary and religious needs.** Catered meals include **vegetarian, vegan, halal, kosher and gluten-free options** and a labeled allergen list. Employees may share dietary needs voluntarily; Facilities does not require or store health information (3.3).
- **Food safety.** Caterers must hold current health-department permits and food-safety certification and are sourced through the Procurement framework (7.2). Hot food is held above **140°F (60°C)** and cold food below **40°F (4°C)**, and food left at room temperature for more than 2 hours is discarded. Leftovers may be offered within 2 hours of service in marked containers, or donated where local law and the caterer allow.
- **Alcohol.** Alcohol is not part of everyday facilities services. Alcohol at Company events follows HR 4.2 and 3.10.
- **Gifts and hospitality received.** Food or gifts from vendors follow the Code of Ethics and Compliance Manual 3.4 (no cash or gift cards; **\$50** per source per year without approval) and nothing is accepted during a sourcing (Procurement Policy Manual 2.2).

Responsibilities

- **Facilities:** stock, clean, order and inspect; keep caterer food-safety records.
- **Employees:** label and remove food, clean up and report problems.

3.7 Cleanliness, Housekeeping and Shared-Space Etiquette

Purpose. To keep the workplace clean, pleasant and respectful.

Policy

- **Cleaning schedule.** Offices are cleaned **nightly** on business days (restrooms, pantries, floors, trash, high-touch surfaces) and **deep cleaned quarterly** (carpets, glass, upholstery), with extra cleaning after events or spills. Facilities inspects cleaning **weekly** (7.3).
- **Personal responsibility.** Clear your desk and dishes, use the right bins, wipe spills and leave shared spaces as you found them.
- **Noise and calls.** Take calls in phone or huddle rooms where possible, use headphones, keep voices moderate in open areas and respect quiet zones. Report persistent noise to Facilities.
- **Scents.** Employees are asked to avoid strong fragrances. Facilities uses low-odor, low-chemical cleaning products at hubs (6.9). Sensitivities may be raised under HR 4.1.
- **Heaters and open flames.** Space heaters, candles and incense are not allowed, because of fire and electrical risk. Temperature concerns go to Facilities (4.3).
- **Decorations.** Employees may decorate assigned spaces reasonably, within fire-safety and lease rules (nothing hung from sprinklers, nothing blocking exits or panels).
- **Plants.** Common-area plants are maintained by a vendor (7.3).
- **Animals.** Only service animals are allowed, unless the Head of Facilities approves a pet-friendly event and the lease permits it.
- **Smoking and vaping.** Not permitted inside Company buildings or vehicles, within **25 feet** of entrances, or at Company events, except in designated outdoor areas (HR 4.3). Cannabis products follow HR 4.2 and building rules.
- **Weapons.** Weapons are prohibited on Company premises and at events to the extent state law permits (HR 4.3). Where state law limits this (for example, firearms lawfully stored in vehicles), Legal advises the Site Lead.
- **Photography.** Do not photograph colleagues or visitors without consent, or any screen, whiteboard or document holding Confidential information (IT Policy Manual 2.1, 4.7).
- **Lost and found.** Found items are kept at reception for **30 days** and then donated or discarded; IDs, valuables and electronics go to IT Security or the police.
- **Conduct.** The Code of Ethics and Compliance Manual (5.1) and HR Policy Manual apply in all Simtora spaces.

Responsibilities

- **All employees:** keep areas clean and considerate.
 - **Facilities:** provide cleaning, address complaints and adjust layouts.
-

3.8 Mail, Shipping, Printing and Reception Services

Purpose. To handle mail, packages and printing efficiently and securely.

Policy

- **Incoming mail and deliveries.** Facilities receives mail and packages, logs items needing a signature and notifies recipients. Packages are held **10 business days** and then returned to sender or discarded. Personal deliveries should be avoided; Simtora is not responsible for their loss or damage.
- **Legal and financial mail.** Legal notices, summonses, subpoenas, government mail and certified mail go to **Legal the same business day** and are not opened by the mailroom unless Legal authorizes. Bank and tax mail goes to Finance the same day. Suspicious mail follows 2.7 and 6.6.
- **Mailing addresses.** Facilities and Legal set each office's mailing address. Do not use it as a personal address.
- **Outbound shipping.** Business shipments use the Company's shipping accounts under Procurement's shipping framework, with tracking numbers logged. The requester gives the recipient, purpose, cost center and classification of contents. **Confidential or Restricted material** is sent tracked, sealed and signature-required. Hardware ships under 5.2.
- **International shipments.** Export-controlled items, international shipments and customs forms are cleared with Legal and IT first (Code of Ethics and Compliance Manual 3.7).
- **Personal shipping.** Personal packages may be shipped at the employee's own cost with the Site Lead's consent, never on Company accounts.
- **Printing.** Print only when necessary, use secure release, collect printouts at once, and shred or lock away Confidential or Restricted paper (IT Policy Manual 4.7). Facilities

manages printer vendors; IT manages print-network security. Duplex printing is the default.

- **Reception services.** Reception greets visitors, handles deliveries, keeps key and loan logs, holds the emergency information binder and supports first response to incidents.
- **Key control.** Physical keys are issued only where badges cannot be used (for example, lockers and cabinets), logged, and returned at separation. Lost keys are reported immediately, and locks are changed where risk requires.

Responsibilities

- **Office Administrators:** handle mail and shipping and keep logs.
 - **Legal:** receives legal and government mail.
-

3.9 Parking, Commuting and Bicycle and EV Facilities

Purpose. To manage parking and commuting facilities where Simtora provides them.

Scope. Only where Simtora leases parking or provides commuting facilities. Business travel is covered by HR 8.1, Finance and Accounting Manual 4.8 and Procurement Policy Manual 6.5.

Policy

- **Allocation.** Where Simtora has parking, spaces are booked through the **parking app or booking tool**, first-come, first-served, with priority to (1) people with **accessible-parking needs or accommodations**, (2) **carpool** vehicles, (3) **electric vehicles** at chargers, (4) visitors and customers, and (5) others. Employees need not explain a disability parking request; HR handles it under 3.3.
- **Cost.** Simtora does not charge employees for parking it provides, except where the lease requires a pass charge, and never deducts parking costs from pay without written consent and legal compliance. Commuter benefits, if any, are described in HR benefits materials.
- **EV charging.** Employees use chargers for up to **4 hours** and then move their vehicles. Simtora may recover electricity cost only if the Head of Facilities and CFO decide so in writing with prior notice. Chargers are for vehicles only.

- **Bicycles and micro-mobility.** Offices provide secure **bicycle racks or rooms** and, where practical, lockers and showers. E-bike and scooter batteries are charged only in designated areas that meet fire-safety rules and are never left charging unattended or overnight (6.4).
- **Risk.** Employees park at their own risk; Simtora is not liable for vehicle damage or theft. Overnight parking needs approval. Violations may be reported to the landlord under the lease.
- **Shuttles.** Simtora does not run shuttles by default. Any shuttle needs approval of the Head of Facilities and CFO, competitive sourcing under the Procurement manual and an accessible route.
- **Commute safety.** Hub offices offer well-lit paths and an **escort to a vehicle or transport** after dark when a guard or staff member is available (2.6).

Responsibilities

- **Facilities:** manage parking, chargers and bicycle facilities.
 - **Employees:** follow parking and charging rules.
-

3.10 Company Events, Offsites and Meeting Venues

Purpose. To organize safe, inclusive and cost-effective events in offices and at outside venues.

Scope. All Company events (All-Hands, customer events, team offsites, celebrations, training sessions) organized by Facilities or a department.

Policy

- **Request and approval.** Events are requested through the Facilities Portal at least **10 business days ahead** for in-office events with more than 25 people or any external guests, and **30 days ahead** for outside venues or events of more than 100 people. The Department Head approves the event; spend follows Finance and Accounting Manual 1.2, and unbudgeted spend needs Finance approval.
- **Venues and contracts.** Venues are sourced under Procurement Policy Manual 6.5. Legal reviews contracts above **\$25,000** (cancellation, insurance and indemnity terms),

and only authorized signers sign (Finance and Accounting Manual 1.2). Nobody signs a venue contract or pays a deposit without approval; deposits follow Procurement Policy Manual 7.3.

- **Accessibility and inclusion.** Venues must be accessible and offer vegetarian, vegan, halal, kosher, gluten-free and allergen-safe options. Invitations ask about access and dietary needs and name a contact (3.3, 3.6). Events should not be centered on alcohol.
- **Safety.** For events with more than 100 people or unusual risk, Facilities completes a **short event risk assessment** (capacity, exits, first aid, security, weather, transport, alcohol), confirms venue permits, and names an **event safety lead** and a **first-aid contact**. Attendees are told the emergency procedures. Venue capacity is never exceeded.
- **Alcohol.** Where served, alcohol is served by licensed staff, non-alcoholic options are equally available, drinking is voluntary, safe rides home are offered, and managers set the example. Impaired employees do not drive (HR 4.2). Spend stays within Finance and Accounting Manual 4.8 and the hospitality rules of the Code of Ethics and Compliance Manual 3.4.
- **Attendance and pay.** Social events are voluntary. Required events (training, All-Hands) are working time (HR 5.1).
- **Travel.** Travel follows HR 8.1 and Finance and Accounting Manual 4.8.
- **Confidentiality.** Events with Confidential discussion use private rooms and no unapproved recording or transcription tools (IT Policy Manual 4.5). Photography is announced and people may opt out.
- **Customer and government guests.** Hospitality follows Code of Ethics and Compliance Manual 3.4; government officials need Compliance Officer approval.
- **Afterwards.** The organizer reports any incident within **1 business day** (Appendix H), and Facilities reconciles costs with Finance within **10 business days**.

Responsibilities

- **Event owners:** plan safely, inclusively and within budget.
 - **Facilities:** support venue, safety and logistics.
 - **Finance and Procurement:** approve spend and contracts.
-

Part 4 – Building Systems and Technology Infrastructure Support

4.1 Building Maintenance Program

Purpose. To keep buildings, equipment and systems safe, reliable and compliant.

Scope. Leased and shared offices. In leased buildings the landlord maintains base-building systems under the lease; Simtora maintains what it controls and monitors the landlord's performance.

Policy

- **Responsibility map.** For each office, Facilities keeps a one-page **responsibility matrix** (landlord, Simtora, vendor) covering HVAC, fire and life-safety systems, elevators, lighting, plumbing, roofing, cleaning, security and utilities. Gaps are raised with the landlord in writing.
- **Preventive maintenance.** Facilities keeps a **preventive-maintenance schedule** in its maintenance system (CMMS) for Simtora-controlled equipment, and tracks landlord inspections. Appendix E sets the inspection and testing calendar.
- **Inspections.** Site Leads do a **monthly walk-through** of every office (exits, extinguishers, emergency lighting, first-aid kits, AEDs, housekeeping, trip hazards, pantry, restrooms) using a checklist; findings become tickets with due dates.
- **Repairs.** Repairs follow the priorities in 1.3. Hazards are made safe immediately (blocked off, signed or shut down) even when the repair takes longer.
- **Compliance certificates.** Facilities keeps current fire-alarm and sprinkler inspection reports, elevator certificates, occupancy and business permits, and health permits for food areas, and diarizes renewals **90 days ahead**.
- **Warranty and service records.** Equipment records list model, install date, warranty and service history so that decisions to repair or replace are informed.
- **Work orders.** Vendors and technicians close work orders with what was done, parts used and time spent. Work over **\$5,000** follows Procurement rules (1.4).

- **Energy and waste.** Facilities tracks utility use and waste per office and reports it annually (6.9).

Responsibilities

- **Site Leads:** run walk-throughs, manage tickets and landlord contact.
 - **Head of Facilities:** maintain the schedule and compliance records.
-

4.2 Power, UPS and Generators

Purpose. To keep critical equipment powered through short outages and to shut it down safely in long ones.

Policy

- **Cloud-first.** Production services run in the cloud, so office power resilience focuses on network rooms, security systems, life-safety systems and any on-site lab. Employees can work elsewhere during an outage (6.7).
- **UPS.** Network rooms and closets, badge and camera controllers and reception systems are on **UPS** sized to carry the full connected load for at least **30 minutes**, with surge protection. Facilities **tests UPS units under load every quarter** and replaces batteries showing more than **15% capacity loss** or reaching the vendor's replacement age.
- **Generators.** Where the building has a landlord generator serving Simtora's space, Facilities confirms in the lease its capacity, test schedule and fuel arrangements, and asks for test results annually. Simtora does not own generators unless the CFO and CEO approve and a fuel, emissions permit and maintenance plan are in place. Where Simtora does hold a generator, it is exercised under load at least monthly and fuel is kept at 90% or more.
- **Emergency lighting and exit signs** are tested monthly (10-second function test) and annually (90-minute test), as NFPA 101 and local codes require, and records are kept.
- **Outage response.** For an outage, Facilities tells occupants using the emergency notification system (6.8), checks life-safety systems, protects equipment (orderly shutdown of network devices if the UPS is running down) and follows 6.7 for closure.

- **Electrical safety.** Only qualified electricians work on panels. Extension cords and power strips are approved types, are not daisy-chained and are not used for permanent wiring. Panels stay clear by at least 36 inches.

Responsibilities

- **Facilities:** test, maintain and document power systems.
 - **IT:** protect and shut down IT equipment in an outage (IT Policy Manual 7.3).
-

4.3 HVAC, Temperature and Air Quality

Purpose. To provide comfortable, healthy conditions and protect equipment.

Policy

- **Office temperature.** Occupied office floors are kept between **70°F and 74°F (21°C to 23°C)** with relative humidity of **30% to 60%** where the building system allows. Temperature complaints are logged in the portal; if more than **3 people in one zone** complain, Facilities investigates within **1 business day**.
- **Network rooms and closets.** Kept at **64°F to 75°F (18°C to 24°C)** and **40% to 60%** humidity, with monitoring and alerts (4.5). Where cooling fails, Facilities and IT treat it as P1.
- **After-hours setback.** HVAC moves to setback (about **76°F in cooling** and **65°F in heating**) after 7:00 p.m. and on weekends, with override on request for on-call or event use.
- **Air quality.** Facilities keeps outside-air and filtration settings to building code and manufacturer specifications, changes filters at least **quarterly** (or as the landlord schedule provides), and responds to odor, dust, mold or water-damage reports within **1 business day**. Visible mold or serious water damage triggers a qualified assessment.
- **Personal heaters and fans.** Not permitted (3.7); Facilities addresses the underlying cause.
- **Construction and renovation.** Dust, fumes and noise are controlled during works, with notice to occupants and no work near air intakes without a plan.

- **Legionella and water systems.** Facilities confirms with landlords that cooling towers and water systems have current water-management plans where required.

Responsibilities

- **Facilities:** monitor and adjust settings and respond to complaints.
 - **Landlord and vendors:** maintain equipment to the lease and code.
-

4.4 Audio-Visual and Conference Room Technology

Purpose. To keep meeting-room technology dependable.

Policy

- **Standard rooms.** Each room type has a defined standard kit (display, camera, microphones, speakers, room console) managed by IT with Facilities. Non-standard installs need IT approval (IT Policy Manual 4.2).
- **Monthly checks.** An AV technician (IT or vendor) checks every meeting room **monthly**: cables and connectors, camera and microphone function, firmware and software updates, remote-control batteries and sample calls. Results go on the room log.
- **Issue reporting.** Employees scan the **QR code in the room**, which opens a ticket with the room location filled in. AV issues are **P2 if a meeting cannot proceed** and P3 otherwise. Facilities and IT share the AV queue and the requester hears back within **4 business hours** for P2.
- **Display lamps and screens.** Projector lamps, where still used, are replaced at **80% of rated life**. Screens and displays are cleaned by Facilities and not by users with liquids.
- **Security of room systems.** Room devices are enrolled, patched and on the managed network, and cameras and microphones have a clear hardware or software indicator when active (IT Policy Manual 4.4, 5.1). Meeting recordings and transcripts follow IT Policy Manual 4.5.
- **Accessibility.** Rooms support captioning and assistive listening on request (3.3).

Responsibilities

- **IT:** configure, secure and support room technology.

- **Facilities:** own the room, furniture, cabling routes and cleaning, and coordinate AV maintenance.
-

4.5 Network Rooms, Cabling and Environmental Monitoring

Purpose. To make sure the physical side of Simtora's network is safe, tidy and monitored. This section complements IT Policy Manual 5.1 and 5.3.

Policy

- **Design and layout.** Network rooms follow IT's standard layout: locked racks, labeled patch panels, cable management, clear aisles, no storage of unrelated items, and safe distance from water pipes and sprinklers where possible.
- **Cabling work.** Structured cabling is installed by licensed, insured vendors, tested and documented, and changes are recorded in IT's inventory. Cables in ceilings and walls are rated for the space (plenum where required).
- **Monitoring and alerts.** Network rooms have **temperature, humidity and water-leak sensors** that alert IT and Facilities around the clock, and a power-status feed from the UPS. Alerts are tested **quarterly**. An alert for water, high temperature or power loss in a network room is **P1** and Facilities and IT respond within **1 hour** (15 minutes in business hours).
- **Fire protection.** Rooms have detection, and suppression suited to the equipment as the fire code and the landlord permit. A clean-agent system, if installed, meets NFPA 2001, has pre-discharge alarms and an abort control, is inspected **twice a year**, and occupants are trained on its warnings. Extinguishers are of an appropriate type (typically CO2 or clean agent) and inspected monthly.
- **Housekeeping.** Corridors and rooms stay clear; combustible packaging is removed on the same day.
- **Landlord and third-party access.** Landlord and building staff enter Simtora network rooms only with notice, an escort and a log entry (2.4).
- **Change and testing.** Facilities and IT test environmental controls at least **annually** (IT Policy Manual 5.3) and after any renovation.

Responsibilities

- **IT:** equipment, monitoring and alert response for IT.
 - **Facilities:** room, power, cooling, fire and access controls.
-

4.6 Water, Plumbing, Lighting and Building Alerts

Purpose. To prevent and respond quickly to building failures that could harm people or equipment.

Policy

- **Leaks and flooding.** Any leak or flood is **P1** where it threatens equipment, electrics or slip hazards. Occupants move equipment away from water if safe, keep away from electrics and call Facilities.
- **Water-leak detection** is installed near network rooms, pantries with equipment above others, and any server or storage area below plumbing.
- **Legionella and water quality.** Facilities keeps water fixtures in regular use, flushes unused fixtures at least weekly and coordinates with the landlord on water-management plans (4.3).
- **Lighting.** Offices use **LED lighting** with occupancy sensors that turn zones off after **15 minutes** of no movement, and reduced overhead lighting after **7:00 p.m.** Task lighting is provided on request, including as an accommodation (3.3). Failed lamps are replaced within **2 business days** and safety-critical lighting (exits, stairwells) within **1 business day**.
- **Gas smell, smoke or odor.** Leave the area, call 911 and the building contact, and do not use switches or phones near a suspected gas leak.
- **Elevators.** Elevator outages are reported to the landlord immediately, and Facilities arranges accessible alternatives and tells anyone who cannot use stairs (3.3, 6.2).
- **Pest and sanitation issues.** Reported through the portal and handled under 7.3.

Responsibilities

- **Facilities:** monitor, respond and coordinate with landlords and vendors.

- **Employees:** report leaks, odors and lighting failures.
-

4.7 Office Design, Moves and New Office Opening

Purpose. To plan and change offices safely, securely and with input from IT, HR and Legal.

Policy

- **Consult IT early.** Facilities consults IT **before** opening, moving or renovating an office so that network room layout, cabling, power, cooling, Wi-Fi and access control are planned (IT Policy Manual 5.3). New network rooms and Zone 4 areas need the CISO's sign-off before use.
- **Design standards.** New and renovated offices meet fire and life-safety codes, ADA, lactation and quiet-room requirements, acoustic and daylight goals, sustainability goals (6.9) and the space plan (3.1). Facilities consults HR and employee representatives on layout and amenities.
- **Approvals and contracts.** Lease and fit-out decisions follow 1.4 and 7.1. Fit-out above **\$100,000** is sourced by formal RFP, with licensed, insured contractors, lien waivers and 5% to 10% retention (Procurement Policy Manual 6.6). Fixed-asset treatment follows Finance and Accounting Manual 7.1 (leasehold improvements over the shorter of lease term and 10 years).
- **Permits and inspections.** Facilities confirms permits, fire-marshall and building inspections and occupancy certificates before staff move in.
- **New office opening.** Appendix F lists the steps, including tax registration (Tax needs **at least 30 days' notice** of a new office; Finance and Accounting Manual 10.1), insurance (Finance and Accounting Manual 6.6), emergency plan and wardens (6.2), first-aid supplies and AEDs (6.3), badge and camera set-up (Part 2), lactation and quiet rooms (3.4), signage, posters (federal and state labor law posters are displayed or provided electronically as the law permits) and HR notification.
- **Moves, adds and changes.** Desk and team moves are requested through the portal at least **5 business days ahead** (10 for more than 20 people). Facilities coordinates IT, badge changes and asset register updates within **2 business days** of the move (IT Policy Manual 2.2).

- **Closing or shrinking an office.** Appendix F also lists the closure steps: notice periods in the lease and to employees (HR handles WARN Act and state notice rules), access removal, asset recovery and data destruction (5.5), restoration obligations, final inspections and records. Finance is told before any lease surrender or termination.
- **Sustainability in design.** Prefer reused furniture, low-emitting materials, efficient systems and waste diversion targets (6.9).

Responsibilities

- **Head of Facilities:** lead projects and confirm approvals.
 - **IT, HR, Legal, Finance:** review and sign off in their areas.
-

Part 5 – Assets, Inventory and Logistics

5.1 Facilities Assets and the Asset Register

Purpose. To know what Facilities owns and where it is, in step with IT and Finance records.

Scope. Furniture, fixtures, AV and building equipment, appliances, tools and leasehold improvements. IT assets follow IT Policy Manual 2.2.

Policy

- **Register.** Facilities keeps a **facilities asset register** in its maintenance system with a unique tag, description, location, purchase date, cost, vendor, warranty end and status. Finance's fixed asset register remains the accounting record (Finance and Accounting Manual 7.2).
- **What is tagged.** Facilities tags any item with a unit cost of *500 or more* *, *all items* * *capitalized* * *at* * **5,000 or more** per unit (or in groups meeting Finance and Accounting Manual 7.1), all AV equipment and appliances and all sit-stand desks. Laptops and mobile devices are tagged by IT regardless of value (Finance and Accounting Manual 7.2).

- **Receiving.** Items are recorded within **1 business day** of receipt and shared with the Controller so that capitalized assets are set up within **3 business days** of receipt confirmation (Finance and Accounting Manual 7.2).
- **Moves and transfers.** Movement between locations or custodians is recorded within **2 business days**, and Finance's register reflects it at the next quarterly reconciliation (Finance and Accounting Manual 7.3).
- **Verification.** Facilities counts assets **annually** and spot-checks **quarterly**, alongside Finance's physical verification (at least 10% by value each quarter). Differences are investigated within **30 days** and losses reported to the Controller.
- **Capitalization and depreciation.** Furniture is depreciated over **7 years**, leasehold improvements over the shorter of lease term and 10 years, and office equipment over 5 years (Finance and Accounting Manual 7.1).
- **Custody.** Each asset has a named custodian (an employee or a Site Lead) who takes reasonable care. Employees are not charged for loss, damage or wear (HR 7.4).
- **Insurance.** Facilities gives Finance and the insurance broker current asset values and locations for the property policy (Finance and Accounting Manual 6.6).

Responsibilities

- **Facilities:** keep the register, tags and counts.
 - **Controller:** record capitalized assets, depreciation and disposals.
-

5.2 Receiving, Staging and Outbound Shipping

Purpose. To control the physical movement of goods so that assets arrive intact, are recorded and reach the right people.

Policy

- **Receiving.** Deliveries go to the loading area or reception. The receiver checks the purchase order (PO) number, quantity and condition against the packing slip and notes damage on the carrier's document before signing. Goods are checked against the PO **within 3 business days** (Procurement Policy Manual 6.2, 7.2) and discrepancies are reported to Procurement at once.

- **Segregation of duties.** The person who receives goods is not the person who approves the invoice for them (Finance and Accounting Manual 1.3).
- **IT hardware.** Laptops, servers, network equipment and phones go to the **IT staging room** (Zone 4), where IT tags, images and enrolls them and records them in the asset system within **1 business day** of receipt (IT Policy Manual 2.2). Facilities keeps the staging room locked, dry, cool and tidy.
- **Furniture and other goods.** Facilities inspects, tags and stores items in a locked storage area until installation.
- **Outbound shipments.** Equipment shipped to remote employees, customers or vendors (for repair or return) is packed in anti-static and protective materials, sent with **tracking and signature** and logged in the asset register with the tracking number. Equipment holding data is **encrypted and enrolled in device management** before shipping (IT Policy Manual 4.2, 5.4). Retired media are shipped separately under chain of custody (5.5).
- **Customs and export.** International shipments follow Code of Ethics and Compliance Manual 3.7 and Procurement Policy Manual 4.3, with licensed customs brokers.
- **Loss in transit.** A missing shipment is reported to the carrier and to Facilities within **1 business day**; equipment holding data is treated as a lost device (IT Security within **1 hour** of discovery).
- **Manual handling.** Use carts and team lifts for heavy items; nobody lifts more than 50 lb alone (HR 4.3).

Responsibilities

- **Facilities:** receive, store and ship.
- **IT:** stage, image and record IT assets.
- **Procurement and Finance:** match receipt to invoices.

5.3 Equipment for Remote Employees

Purpose. To provide remote and hybrid employees with the equipment they need and to recover it properly.

Policy

- **Core equipment.** IT issues laptops and required peripherals under HR 7.4 and IT Policy Manual 2.2, and Facilities packs and ships them to home addresses with tracking, usually within **3 business days** of IT's release. New starters' equipment arrives **before the first day** where possible.
- **Home-office allowance.** The HR allowance (*500one — time; upto*1,000 for fully remote employees) is paid through expenses under HR 7.4 and is not handled by Facilities. Facilities may offer a catalog of ergonomic items at negotiated prices, but employees remain free to choose others.
- **Ergonomic help.** Remote employees may request the HR ergonomic self-assessment and advice (HR 4.3). Facilities may arrange a virtual assessment.
- **Returns.** At separation, employees receive a **prepaid return kit** and return equipment within **7 days** of their last day (HR 7.4, 9.4). Facilities tracks returns and tells IT and HR of any equipment not returned after **10 business days**. Recovery follows HR 7.4; **Simtora does not deduct the value of unreturned equipment from pay** except as the law permits and with separate written consent.
- **Damage and repair.** Broken or defective items are reported to IT and replaced or repaired without charge for normal wear (HR 7.4).
- **Emergency contact and address.** Remote employees keep their address and emergency contact current in the HR system so that emergency messages and shipments reach them (6.8).
- **Shared workspace.** Remote employees who travel to an office use the booking rules in 3.1.

Responsibilities

- **IT and HR:** decide equipment and entitlements.
- **Facilities:** ship, track and recover equipment.

5.4 Furniture and Ergonomics

Purpose. To keep workstations comfortable and safe.

Policy

- **Standards.** Facilities sets furniture standards for desks, chairs, storage and meeting furniture (fire-rated, durable, adjustable and low-emission where possible) with HR and Procurement. Standard desks are **height-adjustable (sit/stand)**, and chairs are ergonomic with adjustable seat, back and arms and a **warranty of 10 years or more** where available.
- **Ergonomic assessment.** Any employee may request an assessment through the portal; the trained ergonomics coordinator assesses within **5 business days** and recommends changes. Accommodation decisions go to HR (3.3, HR 4.1). Ergonomic items are provided at no cost to the employee for office workstations.
- **Repairs and loaners.** Faulty desks or chairs are repaired or replaced within **5 business days**, with a loaner provided within **1 business day** where possible. Repairs are preferred to replacements for parts such as casters and armrests.
- **Safe use.** Do not stand on chairs, overload shelving or lean furniture. Secure tall storage to walls. Report damaged furniture at once and take it out of use.
- **Purchases.** Furniture purchases follow Procurement Policy Manual 6.2 and 6.6, are tagged under 5.1 and, above 5,000 * *per unit* * 25,000 as a group with each item \$1,000 or more, are capitalized (Finance and Accounting Manual 7.1).
- **Reuse.** Facilities reuses, refurbishes and redeploys furniture before buying new (6.9).

Responsibilities

- **Facilities:** provide, repair and track furniture and ergonomic support.
- **Employees:** use furniture safely and report defects.

5.5 Retirement, Disposal and E-Waste

Purpose. To dispose of Company property securely, lawfully and responsibly.

Policy

- **Approvals.** Disposal, sale, donation or write-off of assets is approved under Finance and Accounting Manual 7.3 by net book value or proceeds: under 5,000 * *the Department Head (or IT for IT assets)*; 5,000 to 25,000 * *the Controller and Department Head*; 25,000.01 to 100,000 *

**theCFO; **100,000.01 to 500,000 * *theCEO; over * *500,000*, or any sale to an employee, director or related party, the Board.

- **IT assets and data.** IT wipes and sanitizes every device before it leaves Simtora, following **NIST SP 800-88** and IT Policy Manual 2.4. Drives that held Restricted data, and failed media, are **physically destroyed**. Facilities keeps disposal candidates in locked storage and logs custody from removal to destruction; nothing is left unattended in common areas.
- **Recyclers.** Electronics go only to a recycler certified to **R2v3 or e-Stewards**, reviewed under IT Policy Manual 8.1 and Procurement Policy Manual 4.2. The vendor collects on a regular schedule (monthly at hubs, or on demand) and provides a **certificate of destruction or recycling** for each batch. IT keeps certificates for **at least 7 years** (IT Policy Manual 2.4) and gives Finance a copy for assets above the capitalization threshold.
- **Universal and hazardous waste.** Batteries (including lithium), fluorescent lamps, electronics and cleaning chemicals are collected in marked containers and disposed of under EPA universal-waste and state rules through licensed vendors. Nothing hazardous goes in general trash (Code of Ethics and Compliance Manual 5.4).
- **Furniture and general items.** Reuse or resale first, then donation to charities (with Compliance Officer check where a customer, official or related party is linked), then recycling, and only then landfill. Donations follow Finance and Accounting Manual 4.10.
- **Sales to employees.** Sales at end of life are at fair market value, approved and cleared under Finance and Accounting Manual 7.3 and IT rules, and proceeds go to the Company bank account, not individuals.
- **Records.** A disposal record (asset tag, approvals, method, certificate, proceeds) is kept with the register for **7 years**.
- **Employees.** Do not take, sell or trash Company equipment without IT's written approval (IT Policy Manual 2.4).

Responsibilities

- **IT:** sanitize and approve disposal of IT assets.
 - **Facilities:** manage logistics and non-IT disposal.
 - **Finance:** approve and record disposals.
-

5.6 Off-Site Storage and Physical Records

Purpose. To keep physical records safe and retrievable for as long as the law requires, and no longer.

Policy

- **Paper is the exception.** Records are electronic wherever the law allows. Facilities keeps only paper that must be kept in original form, plus limited working files.
- **Retention.** Facilities follows the retention schedule in Finance and Accounting Manual 11.1 (for example, financial, tax and contract records **7 years**) and Code of Ethics and Compliance Manual 4.4. Nothing is destroyed while a **legal hold** applies; on a hold, Facilities suspends destruction of physical records within **2 business days** (Code of Ethics and Compliance Manual 4.4; Finance and Accounting Manual 11.3).
- **Off-site archive.** Where an off-site vendor is used, it is a vetted vendor with secure, fire-protected, access-logged storage, sourced under Procurement Policy Manual 6.6, and each box is logged with owner, contents category, retention date and location. Retrieval requests are logged and boxes returned within **10 business days**.
- **On-site storage.** Locked file rooms (Zone 4) hold HR and Finance records with access limited to named people. Fireproof cabinets hold originals of critical documents.
- **Destruction.** Confidential and Restricted paper is destroyed by locked shred bins and a certified shredding vendor with a certificate for each collection; destruction is scheduled from the retention date and approved by the record owner (IT Policy Manual 2.4).
- **Transport.** Records move only in locked containers with logged custody.

Responsibilities

- **Record owners:** set retention and approve destruction.
 - **Facilities:** run storage, retrieval and destruction logistics.
-

Part 6 – Health, Safety, Emergency Management and Sustainability

6.1 Health and Safety Program and Incident Reporting

Purpose. To provide a safe and healthy workplace, comply with OSHA and state law, and work with HR under HR Policy Manual 4.3.

Scope. All offices, events and Company-controlled spaces. Home workspaces are addressed in HR 4.3.

Policy

- **Program owner.** The Head of Facilities, with the Chief People Officer, owns the health and safety program (HR 4.3). The Safety and Security Lead runs it day to day and reports to the Executive Team quarterly.
- **Hazard assessment.** Each office has a **workplace safety assessment** at least **annually** and after any layout change or serious incident, covering egress, electrical, ergonomics, slips and trips, storage, lifting, chemicals, lab or shop areas, and violence risk. Findings go into a tracked action list with owners and dates; safety-critical items are fixed or made safe immediately.
- **Employee rights.** Employees may report hazards and injuries, and stop or refuse unsafe work as the law allows, without retaliation. They may contact OSHA or the state agency (HR 4.3; Code of Ethics and Compliance Manual 2.3, 2.5).
- **Reporting.** Any injury, illness, near miss or hazard is reported to the manager and Facilities or HR **the same day** (HR 4.3), through the portal or by phone in urgent cases. HR completes the incident record (Appendix H) and handles workers' compensation; Facilities investigates the physical cause.
- **OSHA reporting.** The Company reports to OSHA **within 8 hours** of any work-related fatality and **within 24 hours** of any in-patient hospitalization, amputation or eye loss, as 29 CFR 1904.39 requires. HR and Facilities decide together who calls; the Chief People Officer is told immediately. Simtora's industry may be partially exempt from routine federal injury-log requirements, but HR **maintains OSHA-format injury and**

illness records regardless and posts the annual summary where required; Legal confirms any stricter state rules.

- **Investigation.** Serious incidents and near misses with high potential are investigated within **5 business days**, with a root cause and corrective actions tracked to closure. Findings are shared without blame.
- **Contractors and multi-employer sites.** Facilities tells contractors of hazards and requires them to follow Simtora safety rules (7.4, Appendix I), and coordinates with landlords and other tenants on shared risks.
- **Hazard communication.** Chemicals used by Facilities and vendors (cleaning products, lab chemicals) have current safety data sheets in an accessible place and are labeled, stored and used as the OSHA Hazard Communication Standard requires.
- **Electrical, lifting and equipment.** Only qualified people perform electrical work. Use carts and team lifts, and nobody lifts more than **50 lb** alone. New equipment and any hazardous materials are checked by Facilities before use (HR 4.3).
- **Infectious illness.** Employees with contagious illness stay home and use sick leave (HR 4.3). Facilities follows public-health guidance for cleaning, ventilation and signage and may introduce temporary measures with HR.
- **Posters and notices.** Facilities and HR keep required federal and state workplace notices posted, or available electronically where the law allows.
- **Metrics.** Facilities reports incidents, near misses, inspection findings and closure times to the committee quarterly (8.2).

Responsibilities

- **Employees:** work safely, report hazards and injuries the same day.
 - **Managers:** act on reports and support safe practices.
 - **Facilities and HR:** assess, investigate, record and report.
-

6.2 Emergency Action Plans, Wardens and Drills

Purpose. To make sure everyone in an office can respond correctly to fire and other emergencies. This section implements OSHA's emergency action and fire prevention plan requirements (29 CFR 1910.38, 1910.39) and local fire codes.

Policy

- **Emergency action plan (EAP).** Every office has a written EAP (outline in Appendix G) covering reporting, evacuation routes and assembly points, shelter-in-place, roles, help for people who need assistance, accounting for people, and shutdown of critical equipment. The Site Lead reviews the EAP **annually**, after each drill and after any change of layout.
- **Posted information.** Evacuation maps showing routes, exits, extinguishers, first-aid kits and AEDs are posted at elevator banks, stairwells and each exit. Exits and paths **must never be blocked or locked**, and fire doors are not propped open.
- **Emergency Response Team (ERT).** Each office has a **Chief Warden**, floor wardens and deputies, first aiders (6.3) and a Facilities lead. Wardens are volunteers or appointed by Department Heads, cover at least **1 per 20 occupants per floor on an anchor day** (with deputies so each area is covered when someone is away), wear identifying vests and are trained within **30 days** of appointment and annually thereafter (8.3). The list is posted and given to reception.
- **Evacuation.** On an alarm, everyone leaves by the nearest safe exit without collecting belongings, does not use elevators (except where the plan designates them for people who need help), goes to the **assembly point** and stays until the Chief Warden says it is safe. Wardens sweep their areas if safe, help those who need assistance and report to the Chief Warden with the visitor list from reception (2.3). Nobody re-enters until cleared.
- **People who need assistance.** Personal emergency evacuation plans (3.3) name a buddy and a route or refuge area; wardens know who needs help and the fire service is told on arrival.
- **Drills.** Each office holds an **evacuation drill at least once a year**, and twice for offices above 100 people or with more than one floor; at least one drill is unannounced in timing. Drills vary the scenario (for example, a blocked stairwell). Facilities records time to clear, issues and actions, and reports to the committee. Drills are also held for **shelter in place and lockdown** at least once every two years.
- **Alarms and systems.** Alarms are tested as fire codes require and the landlord's schedule provides. Facilities keeps test records and checks Simtora space for detectors, strobes and pull stations that are blocked or damaged.
- **After an emergency.** The Site Lead makes sure everyone is accounted for, gives information to responders, secures the site, notifies the Head of Facilities and holds a

review within **10 business days**.

- **Remote and hybrid staff.** The EAP covers those in the office on the day; remote employees follow 6.8.

Responsibilities

- **Site Leads and Chief Wardens:** maintain plans, ERT and drills.
 - **Employees:** know the routes and follow the wardens.
-

6.3 First Aid, AEDs and Medical Emergencies

Purpose. To provide prompt first aid and a fast response to medical emergencies.

Policy

- **Call 911 first** for a serious injury or illness, then the site security or Facilities contact. Do not move an injured person unless there is danger.
- **First-aid kits** are provided in every pantry, at reception and in labs, stocked to ANSI/ISEA Z308.1 (or local requirement), and checked **monthly** by Facilities with expired items replaced. Kits show the location of the nearest AED and a list of trained first aiders.
- **Trained first aiders.** Each office has at least **2 employees** trained in first aid, CPR and AED use, and at least **1 trained first aider per 50 employees expected on site** on an anchor day. Certification is kept current (renewal every 2 years), and Simtora pays for training and time.
- **AEDs.** Hub offices have **AEDs** placed within about **3 minutes' walk** of any workspace (reception, near the pantry on each floor, and any gym or wellness space). Units are inspected **monthly** (status light, pads and battery), pad and battery expiry are tracked, and state law on medical oversight, registration and Good Samaritan protection is followed. AED locations are shown on evacuation maps.
- **Medical incidents.** The first aider stays with the person until responders arrive; a warden meets responders at the entrance and holds an elevator if needed. Employee health information stays confidential and is shared only with responders and HR as needed.

- **Blood and bodily fluids.** Facilities provides spill kits and gloves, and vendors follow bloodborne pathogen standards for cleanup.
- **Mental-health emergencies.** Anyone at immediate risk is helped by calling 911 or the **988 Suicide and Crisis Lifeline**; managers involve HR and the Employee Assistance Program (HR 4.4).
- **Allergic reactions.** Employees who choose to tell Facilities of severe allergies and carry epinephrine may share a plan with their team; Facilities does not require disclosure.

Responsibilities

- **Facilities:** provide and maintain supplies, AEDs and training.
 - **First aiders:** respond within their training and stay current.
-

6.4 Fire Safety and Fire Protection Systems

Purpose. To prevent fires and keep detection, suppression and egress systems working.

Policy

- **Prevention.** No open flames, space heaters, or overloaded outlets. Combustibles are kept away from electrical panels and heat. Cooking equipment is used only in pantries, and cooking is never left unattended. E-bike, scooter and power-tool **lithium-ion batteries** are charged only in designated areas without combustibles, never overnight and never inside network rooms.
- **Systems.** Sprinklers, alarms, extinguishers, emergency lighting and exit signs are inspected and tested per the fire code and the calendar in Appendix E. Extinguishers are **visually checked monthly** and serviced **annually** by a licensed vendor, with tags current.
- **Impairments.** If a fire system is shut down (for example, for repairs), the landlord or vendor must tell Facilities, alternative protection or a fire watch is arranged, and staff are told. Nobody shuts off or tampers with fire equipment.
- **Housekeeping.** Storage keeps at least **18 inches** below sprinkler heads, aisles and exits clear, and stairwells and corridors free of stored items.

- **Extinguisher training.** Wardens receive hands-on or online extinguisher training. Employees are told to evacuate and call 911 first, and use an extinguisher only if trained, the fire is small and there is a clear exit behind them.
- **Hot work and contractors.** Welding, cutting, soldering and torch work by vendors need a **hot-work permit** from Facilities and a fire watch.
- **Fire marshal.** Facilities meets fire-marshal inspections and closes any findings by the date given (2.8).
- **Fire investigations.** Any fire, even if extinguished, is reported to Facilities and the landlord the same day.

Responsibilities

- **Facilities:** maintain, test and record systems, and manage contractors.
 - **Everyone:** avoid fire risks and know the evacuation routine.
-

6.5 Severe Weather, Natural Hazards and Shelter in Place

Purpose. To protect people from weather and natural hazards and decide when offices open or close.

Policy

- **Hazard profile.** Each Site Lead documents the hazards for the office's area (for example, hurricane, tornado, flood, wildfire smoke, winter storm, earthquake, extreme heat) and the response, with the landlord's guidance, in the EAP.
- **Decision to close or delay.** For weather or other hazards, the **Head of Facilities** (or the Site Lead for regional offices) decides **as early as possible, and normally by 6:00 a.m.** local time for a same-day closure, after consulting the Chief People Officer and using official warnings. Employees are told through the emergency notification system (6.8). The safety of people **outranks** attendance.
- **Pay and work.** When an office closes, employees work from home where their role permits. For roles that cannot, HR decides the pay treatment consistent with HR 5.1, the FLSA and state law (for example, state reporting-time pay rules), and tells managers so that it is applied consistently. Employees are not required to travel in unsafe conditions and are not penalized for choosing not to (HR 4.3).

- **Shelter in place.** For tornado, hazardous release, or outside threat, occupants move to the designated shelter areas (interior rooms away from glass), close doors and wait for the all-clear from the Chief Warden or authorities.
- **Earthquake.** Drop, cover and hold on; after shaking, check for injuries and hazards, evacuate if the building is unsafe, and expect aftershocks. Heavy furniture and shelving in earthquake zones are anchored.
- **Extreme heat and cold.** Facilities monitors HVAC and building conditions and gives guidance on water and temperature; if HVAC fails and conditions are unsafe, the office may close (6.7).
- **Smoke and air quality.** In wildfire smoke or poor outdoor air, Facilities checks air-intake filtration and may suspend outdoor activities and events; the Site Lead may recommend remote work.
- **Preparation.** Site Leads keep emergency supplies (flashlights, batteries, water, first-aid, radios) suitable for the location.

Responsibilities

- **Head of Facilities and Site Leads:** decide and communicate.
 - **Managers and employees:** follow instructions and keep contact details current.
-

6.6 Workplace Violence, Active Threats and Bomb Threats

Purpose. To prevent and respond to threats, in line with HR 4.3 and Code of Ethics and Compliance Manual 5.3.

Policy

- **Prevention.** Violence, threats, stalking, intimidation and weapons on Company premises are prohibited to the extent state law permits (HR 4.3). Access control, visitor rules (Part 2), lighting, and reception design all reduce risk.
- **Reporting.** Report any threat or concerning behavior at once to a manager, Facilities/Security or HR. In an emergency, **call 911 first**.
- **Threat assessment.** A small **threat assessment team** (Safety and Security Lead, HR, Legal, and the CISO for cyber-linked threats) reviews credible threats promptly (target:

within **1 business day**), decides on protective steps and involves law enforcement as appropriate, with respect for privacy and non-discrimination.

- **Domestic violence, stalking and harassment.** Employees affected can talk confidentially to HR about safety planning, leave and accommodation, and Facilities can add safety measures (for example, changed parking, escort, restricted access, photo shared with reception and security with consent) (HR 4.3).
- **Active threat.** Follow **Run, Hide, Fight**: run if there is a safe escape route, hide and lock or barricade if not (lights off, silence phones), and as a last resort fight. Call 911 when safe. Do not open doors for anyone except identified police. Drills and training are given (6.2, 8.3).
- **Bomb and other threats.** A person receiving a threat by phone keeps the caller on the line, notes exact words, voice and background, and calls 911 and security. Written threats are kept and not handled further. The Site Lead, with responders, decides whether to evacuate. Suspicious packages are left alone and the area cleared (2.7).
- **After an incident.** Simtora provides support through the Employee Assistance Program and HR, informs employees promptly, and reviews the response within **10 business days**.
- **Restraining orders.** Employees who have protective orders should tell HR or Facilities so that reasonable safety measures can be taken.

Responsibilities

- **Facilities and HR:** prevention, assessment and response.
 - **Everyone:** report threats and follow emergency instructions.
-

6.7 Business Continuity for Facilities and Office Closure

Purpose. To keep the business running when an office cannot be used, working with IT Policy Manual 7.3.

Policy

- **Hybrid resilience.** Because the workforce is hybrid, an office closure does not by itself stop work. Employees work from home or another approved location, using approved devices and the alternate communications channels IT maintains (IT Policy Manual 7.3).

- **Facilities continuity plan.** Facilities keeps a short plan for each office: emergency contacts, landlord and utility numbers, insurance and broker contacts, keys and access arrangements, critical vendors, alternative workspaces (coworking or flex agreements) and how to secure the site.
- **Triggers.** An office is closed or restricted when there is fire, flood, structural damage, loss of power, water or cooling that makes conditions unsafe, credible threats, hazardous release, government order, or severe weather.
- **Decision and communication.** The Head of Facilities (or delegate) decides, with the CPO and CISO consulted, and the Executive Team is told **within 1 hour** of any closure of a hub office. Employees are told through the emergency notification system (6.8).
- **Critical on-site work.** A small set of Facilities staff and IT staff may need on-site access (for example, to secure the site or manage network equipment) **only if safe**; nobody is required to enter an unsafe site.
- **Alternate space.** Facilities maintains a list of pre-vetted alternative spaces and flex agreements sized for critical teams, and a way to arrange them within **1 business day**.
- **Insurance and records.** Facilities documents damage (photos, logs) and notifies Finance so that claims start promptly (Finance and Accounting Manual 6.6); the carrier is notified immediately for events that may cause a claim.
- **Reoccupation.** People return only after the Site Lead and, where needed, the landlord and authorities confirm that the space is safe and systems (fire, HVAC, network, security) are checked.
- **Testing.** Continuity arrangements for offices are tabletop-tested **annually** with IT and HR, and lessons learned are recorded within **30 days** (IT Policy Manual 7.3).

Responsibilities

- **Head of Facilities:** maintain plans and decide closure.
- **IT and HR:** keep remote work and communications ready.

6.8 Emergency Notification and Remote-Employee Safety

Purpose. To reach everyone quickly in an emergency, including those who are not in the office.

Policy

- **Mass notification system.** Facilities, with IT, operates a **mass notification system** (text, email, app and chat) that can reach all employees, or those in a location, within **5 minutes** of a decision. Messages are short, say what has happened, what to do and where to get updates.
- **Contact data.** HR holds each employee's phone number, home address and emergency contact. Employees check them **at least annually** and after any change (HR 4.3). Facilities and IT may use the data only for emergencies and drills.
- **Tests.** The system is tested **twice a year**, and results (delivery rate, response times) are reported to the committee.
- **Roles.** The Head of Facilities (or delegate), the Chief People Officer and the CEO can authorize messages. Legal is consulted for messages that involve legal risk, and the Executive Team for anything public.
- **Remote employees.** Remote employees are told of events in their region (severe weather, civil emergency) and can use "I'm safe" replies. Managers check on affected teams. Employees should know local emergency numbers and shelter guidance (HR 4.3).
- **Travelers.** Employees traveling for business are covered by the duty-of-care tracking of the Company travel platform (HR 8.1); Facilities and HR use it to alert travelers in an affected area.
- **On-call staff.** Site Reliability Engineering, Support and Security teams keep the on-call contact tools and escalation paths up to date (IT Policy Manual 7.5).
- **Accessibility.** Notifications are sent in more than one form (text, audio and visual) and alarms have visual alerts for people who are deaf or hard of hearing (3.3).

Responsibilities

- **Facilities and IT:** run and test the system.
- **Employees:** keep contact details current and respond.

6.9 Sustainability and Environmental Responsibility

Purpose. To reduce the environmental impact of Simtora's offices and support Code of Ethics and Compliance Manual 5.4.

Policy

- **Energy.** Offices use **LED lighting with occupancy sensors**, efficient HVAC with schedules and setbacks (4.3), and smart power strips. Where the landlord allows, Facilities chooses green-energy options and reviews utility data for savings. Facilities tracks energy use per office annually.
- **Waste and recycling.** Offices provide **dual- or multi-stream bins** (recycling, compost where available, landfill) with picture signage and check contamination periodically. Simtora aims to **divert at least 60% of office waste** from landfill at hub offices and tracks progress annually.
- **Water.** Fixtures are low-flow where possible and leaks are repaired promptly (4.6).
- **Purchasing.** Facilities prefers recycled-content, refillable, energy-efficient and low-packaging goods and products with credible certifications (for example, ENERGY STAR, EPEAT, FSC), and asks major vendors about environmental commitments (Procurement Policy Manual 2.4).
- **Electronics.** All e-waste goes through certified recyclers (5.5), and IT reuses or refurbishes devices where security allows (Code of Ethics and Compliance Manual 5.4).
- **Refrigerants and chemicals.** Refrigerant handling and hazardous-substance use are done only by licensed vendors, and leaks and disposal are documented as EPA rules require (Code of Ethics and Compliance Manual 5.4).
- **Commuting and travel.** Facilities supports bicycle, transit, carpool and EV options (3.9) and reduces unnecessary printing and shipping.
- **Claims.** Public statements about sustainability, carbon neutrality or "green" credentials must be truthful, substantiated and reviewed by Legal under the FTC Green Guides and state laws (Code of Ethics and Compliance Manual 3.2, 5.4). Facilities does not make external environmental claims on its own.
- **Disclosure laws.** Legal decides annually whether climate-related disclosure laws apply to Simtora; if so, the CFO and General Counsel own reporting, and Facilities supplies energy and waste data (Code of Ethics and Compliance Manual 5.4).
- **Reporting.** Facilities gives the Facilities & Workplace Committee an annual sustainability summary (energy, waste diversion, recycling, e-waste, water) and shares it with the Compliance Committee.

- **Ideas.** Employees are encouraged to suggest ways to reduce waste and energy use through the portal.

Responsibilities

- **Facilities:** run the program and report.
 - **All employees:** recycle correctly and use resources thoughtfully.
-

Part 7 – Leases, Vendors and Contractors

7.1 Real Estate, Leases and Landlord Management

Purpose. To make sure Simtora takes, changes and leaves space with proper approval, accounting and legal protection.

Scope. Leases, subleases, licenses, flex and coworking agreements, and landlord relationships for every office.

Policy

- **Approval.** Any **sale or lease of real property** needs **Board approval** regardless of amount (Finance and Accounting Manual 1.2). The lease is first reviewed by **Legal**, and the **Controller is told before signing** so that it is accounted for under ASC 842 (Finance and Accounting Manual 2.6). Signature is by the CEO, CFO or General Counsel only (Finance and Accounting Manual 1.2). Flex or coworking agreements of **12 months or less** with no purchase option still need Legal review and the approval level in 1.4, and are reported to the Controller.
- **Business case.** Each new lease, renewal or expansion is supported by a written case: headcount and attendance forecasts, cost per seat and total cost of occupancy, alternatives (flex space, sublease, downsizing), location and commute, accessibility, security and sustainability. The CFO and Head of Facilities present it to the CEO and the Board.
- **Sourcing.** Brokers and project managers are selected by competition (**three proposals**) with fees disclosed (Procurement Policy Manual 6.6). Landlord negotiation is led by

Facilities with Legal and Finance.

- **Key terms.** Legal and Facilities check for: term and options, rent and escalations, operating-expense pass-throughs and caps, tenant improvement allowances, restoration and surrender obligations, assignment and sublease rights, termination and expansion rights, insurance and indemnity, access and security, permitted use (including labs and data equipment), signage, parking, accessibility, holdover, and landlord services and response times. **Personal guarantees are not given** without the Board's approval (Finance and Accounting Manual 6.4).
- **Lease register and critical dates.** Legal and Finance keep the lease in the **contract register**. Facilities keeps a **critical-dates calendar** (notice of renewal or termination, rent reviews, option dates, insurance certificates, restoration deadlines) with reminders at **12, 9 and 6 months** before each notice deadline. Notice of non-renewal or renewal is decided **at least 9 months** before the deadline so that space planning and negotiation are not rushed.
- **Accounting hooks.** Facilities gives the Controller lease data changes (modifications, option exercises, terminations) **within 5 business days**, and the restoration cost estimate for asset retirement obligations (Finance and Accounting Manual 2.6, 7.1).
- **Landlord relations.** Each office has a named landlord contact. Facilities logs service requests, holds regular meetings, checks operating-cost statements against the lease (with Finance) and disputes errors in writing within the lease time limit.
- **Insurance.** Facilities and Finance make sure certificates of insurance required by the lease are in place and renewed (Finance and Accounting Manual 6.6).
- **Subleases and surplus space.** Surplus space is offered for sublease only with CFO and Legal approval.
- **Data and technology space.** Data-center or colocation space is sourced as a Critical or High vendor (Procurement Policy Manual 6.6; IT Policy Manual 8.1).
- **Related parties.** Leases with a related party need Compliance approval and Audit Committee review above the **\$10,000** per-year threshold (Code of Ethics and Compliance Manual 3.5).
- **Tax.** Finance is told at least **30 days** before Simtora opens an office in a new state or locality (Finance and Accounting Manual 10.1).

Responsibilities

- **CFO and Head of Facilities:** lead the real-estate strategy.

- **Legal:** review and negotiate.
 - **Controller:** account for leases.
-

7.2 Facilities Vendor Management

Purpose. To choose, contract and manage vendors that serve Simtora offices.

Policy

- **Sourcing.** Facilities vendors are sourced under the Procurement Policy Manual: methods by value (3.1), framework agreements for cleaning, security, catering, maintenance and supplies (3.9, 6.6), emergency purchases (3.8) and the special channels in 6.7.
- **Preferred vendors and frameworks.** Facilities keeps **framework agreements** with rates and service levels for recurring services and reviews them **annually** for price, performance and compliance.
- **Onboarding.** Vendors are onboarded under Procurement Policy Manual Part 4 (due diligence, sanctions screening, insurance, W-9, conflicts). Vendors whose staff work on premises are at least Medium tier (Procurement Policy Manual 4.1) and higher if they access secure areas or data.
- **Contracts.** Contracts are on Legal-approved templates and include scope, service levels and credits, insurance, indemnity, safety and security rules, background-check requirements where staff have access to sensitive areas, subcontracting limits, confidentiality, termination and the Supplier and Partner Standards (Code of Ethics and Compliance Manual 5.5). Facilities staff do not sign vendor contracts unless within delegated authority (1.4).
- **Conflicts and gifts.** Facilities staff declare any personal interest in a vendor, accept no gifts beyond the Code limits and take no gifts during a sourcing (Procurement Policy Manual 2.1, 2.2; Code of Ethics and Compliance Manual 3.4, 3.5).
- **Vendor workers' conduct.** Vendor personnel follow Simtora's safety, conduct, harassment and confidentiality rules while on premises (Appendix I). Vendors are responsible for lawful employment, wages, training and safety of their workers.
- **Payment.** Invoices are matched to POs and receipts before payment, with standard terms of **net 30** (Finance and Accounting Manual 4.3, 4.4). Nobody may direct

payment outside the AP process.

- **Performance.** Facilities scores key vendors **quarterly** (quality, response, safety, cost, compliance) and shares the scorecard with the vendor; Procurement takes part in annual reviews. Persistent underperformance leads to a corrective plan, service credits or exit (Procurement Policy Manual 4.4, 4.5).
- **Renewals.** Facilities calendars vendor renewals at **150, 120, 90, 60 and 30 days** and gives notice at least **90 days** before renewal (Procurement Policy Manual 5.3).
- **Continuity.** For critical services (cleaning, security, building engineering, catering), Facilities identifies a backup vendor.

Responsibilities

- **Facilities:** manage vendors day to day.
 - **Procurement:** sourcing, onboarding and contracts.
 - **Finance:** payment and records.
-

7.3 Janitorial, Pest Control, Landscaping and Other Recurring Services

Purpose. To set standards for routine building services.

Policy

- **Janitorial.**
 - Cleaning is performed on business nights (typically **8:00 p.m. to 2:00 a.m.**, or as the building allows) and covers restrooms, pantries, floors, trash and high-touch surfaces. Deep cleaning is **quarterly**.
 - Cleaners follow a checklist and use low-odor, low-toxicity products where possible (6.9). They do not enter network rooms or locked file rooms except when scheduled and escorted (2.4), and are told to leave Confidential papers and screens untouched.
 - A Facilities supervisor inspects **weekly** using a scored checklist. Deficiencies are corrected within **1 business day**, and repeated or serious failures give rise to **service credits** under the contract.

- Vendors' workers are trained on chemical safety, bloodborne pathogens and Simtora security rules, and are given badges limited to their hours and areas.
- **Pest control.** Licensed vendors provide **monthly** preventive service and respond to reports within **1 business day**. Treatments are scheduled outside occupied hours, with notice, and use the **least-toxic effective methods** (integrated pest management). Traps are checked regularly, and food is stored sealed. Sightings are reported through the portal.
- **Plant care.** A vendor maintains interior plants weekly. Chemical fertilizers and pesticides are not used inside occupied areas.
- **Waste and recycling haulers.** Facilities checks that haulers are licensed, and that document-shredding and e-waste vendors provide certificates (5.5, 5.6).
- **Elevators, fire systems and HVAC servicing.** Serviced by licensed vendors or the landlord, with reports kept (4.1, Appendix E).
- **Window cleaning, pressure washing and exterior work.** Scheduled with notice, done by insured contractors and not during high-traffic hours.
- **Security and reception vendors.** Follow 2.7 and Appendix I.
- **Catering and coffee services.** Follow 3.6.

Responsibilities

- **Facilities supervisors:** inspect and enforce.
 - **Vendors:** deliver to the contract and follow site rules.
-

7.4 Contractors, Construction and Work on Premises

Purpose. To make sure work by outside contractors is safe, insured, permitted and secure.

Policy

- **Before work starts.** Facilities confirms: a signed contract and PO (Procurement Policy Manual 7.1); insurance certificates naming Simtora and the landlord where the lease requires; licenses; a **safety plan or job hazard analysis** for higher-risk work; permits; the landlord's approval and rules; and a schedule that limits disruption. A **pre-work briefing** covers hazards, emergency routes and site rules.

- **Insurance.** Contractors carry at least **general liability of 1M per occurrence and 2M aggregate, workers' compensation** (statutory limits and 500,000 employer's liability) and *** * auto liability of 1M**** where vehicles are used; construction contractors also carry an **umbrella of \$5M** (Procurement Policy Manual 5.2, 6.6). Certificates are checked before work and kept.
- **Licensing and compliance.** Contractors hold required state and local licenses and comply with building codes, permits, ADA, OSHA and environmental rules, including lead and asbestos precautions in older buildings.
- **Site rules.** Contractors sign in, wear ID badges and follow the escort and secure-area rules (2.3, 2.4). They protect occupied areas from dust, noise and fumes, keep egress clear, do not use Simtora's Wi-Fi except on a guest network and do not connect equipment to Company systems. **Hot work** needs a permit (6.4). Lockout/tagout, work at height, confined spaces and electrical work follow OSHA rules and the contractor's program.
- **Supervision.** A Facilities representative oversees work, records daily attendance and inspects quality and safety. Any injury, near miss or damage is reported to Facilities immediately and recorded (Appendix H).
- **After-hours work.** Follow 2.6 and 7.3; work at night is scheduled with notice, and supervised access through the badge system.
- **Payment and lien waivers.** Payments for construction are tied to progress, backed by **lien waivers** and subject to **5% to 10% retention** until completion and punch-list sign-off (Procurement Policy Manual 6.6, 7.3). Change orders follow Procurement Policy Manual 5.4.
- **Close-out.** Facilities collects as-built drawings, warranties, permits, test records, manuals and final lien waivers, and updates the asset register and Finance for capitalization (5.1).
- **Stop-work authority.** Any Simtora employee may stop work that appears immediately dangerous and tell Facilities.

Responsibilities

- **Facilities:** manage contractor safety and access.
- **Procurement and Legal:** contracts and insurance.
- **Contractors:** comply with law and site rules.

7.5 Vendor Performance, Insurance and Records

Purpose. To keep evidence of vendor compliance and performance.

Policy

- **Vendor file.** Facilities and Procurement keep for each service vendor the contract, insurance certificates, licenses, scorecards, incident reports and inspection results, and calendar expiry dates **60 days ahead**. Vendors with expired insurance or licenses are not allowed to work on premises until renewed.
- **Incidents and claims.** Vendor-caused damage or injury is reported to Facilities and Finance the same day, and Finance tells the insurer and the vendor's carrier (Finance and Accounting Manual 6.6).
- **Audits.** Procurement or Facilities reviews a sample of vendor files annually (8.2).
- **Records.** Vendor and lease records are kept **7 years** after the contract ends or final payment, longer for legal holds (Procurement Policy Manual 8.1; Finance and Accounting Manual 11.1).
- **Complaints and escalation.** Employees' complaints about vendors go to Facilities; unresolved ones to the Head of Facilities and Procurement.

Responsibilities

- **Facilities:** maintain vendor files and act on findings.
 - **Procurement:** support and audit.
-

Part 8 – Records, Monitoring and Training

8.1 Facilities Records and Retention

Purpose. To keep the records that prove compliance and support decisions, without keeping them too long.

Policy

Record	Owner	Retention
Leases, amendments, landlord correspondence, critical dates	Legal / Facilities	Life of lease plus 7 years
Purchase files, contracts, vendor files, insurance certificates, lien waivers	Facilities / Procurement	7 years after contract end or final payment
Facilities and fixed asset records, disposal records, certificates of destruction	Facilities / Controller / IT	7 years after disposal (certificates at least 7 years)
Fire, life-safety, elevator, HVAC and equipment inspection and test records	Facilities	3 years minimum, or life of equipment for major systems, or as the code requires
Emergency action plans, drill and training records	Facilities	5 years
OSHA injury and illness records, incident investigations	HR / Facilities	5 years after the year covered (or longer as OSHA or state law requires); medical and exposure records as the law requires (up to 30 years)
Visitor logs	Facilities	12 months
CCTV footage	Facilities	30 days , unless preserved for an incident or legal hold
Badge and access logs	Facilities / IT Security	12 months (IT Policy Manual 5.5); longer if needed for an investigation
Access-list reviews and exception records	Facilities	3 years
Environmental, waste and sustainability records	Facilities	5 years (longer where the law requires)

- **Legal holds** override all periods (Code of Ethics and Compliance Manual 4.4).
 - **Storage and disposal** follow 5.6, and records containing personal data are handled under the privacy program (Code of Ethics and Compliance Manual 4.1).
 - **Where the law is longer** than this table, the law applies.
-

8.2 Inspections, Audits and Metrics

Purpose. To check that the manual works and improve it.

Policy

- **Site inspections.** Site Leads perform a **monthly walk-through** (4.1). The Safety and Security Lead does a **semi-annual** inspection of each hub office and an annual one of each regional office.
- **Internal review.** Facilities reviews Zone 4 access lists, badge lists, vendor insurance, drill records and asset counts on the schedule in Appendix E. Compliance and internal audit may review Facilities controls as part of the annual plan (Finance and Accounting Manual 9.5, 9.6).
- **Metrics.** Facilities reports monthly to the CFO and quarterly to the committee, including:
 - Portal tickets by priority, response and resolution times against the targets in Appendix A;
 - Occupancy and desk and room utilization;
 - Safety incidents, near misses, inspection findings and closure time;
 - Security incidents, badge exceptions and access-review results;
 - Drill results and ERT training coverage;
 - Vendor scorecards and insurance status;
 - Cost against budget, cost per seat, energy and waste data;
 - Employee satisfaction scores.
- **Targets.** P1 response within targets in at least **95%** of cases; P2 and P3 tickets resolved within targets in at least **90%**; zero overdue safety-critical actions; 100% of active wardens trained; 100% of Zone 4 access lists reviewed on time.

- **Reporting up.** Serious matters go to the CFO and CEO **within 24 hours**. The Head of Facilities gives the Executive Team an annual safety, security and facilities report, and Compliance includes facilities compliance in its report to the Compliance Committee.
 - **Corrective actions.** Findings are logged with owner and due date and tracked to closure.
-

8.3 Training and Awareness

Purpose. To make sure people know what they need to.

Policy

Audience	Training	Timing
All employees	Emergency procedures, evacuation routes, badge and visitor rules (part of onboarding)	Within 30 days of hire, and annual refresher
Reception and Office Administrators	Visitor procedures, government-visit rules, package screening, emergencies, customer service, accessibility	Within 30 days of starting, then annually
Wardens and ERT	Evacuation, sweeping, assisting people who need help, extinguisher use, shelter in place	Within 30 days of appointment, then annually
First aiders	First aid, CPR and AED	Before appointment, renewed every 2 years
Facilities staff	Safety, electrical and hazard awareness, hazard communication, lockout/tagout where relevant, security, data privacy	Within 30 days , then annually
Managers	Safety responsibilities, incident reporting, workplace violence, accommodation basics	Within 60 days of becoming a manager, then annually
Hosts of visitors	Visitor rules (short module)	Within 30 days of hire, and with the annual security training
Vendors on premises	Site rules, safety and security briefing	Before first work, and annually for long-term vendors

- Training is delivered through the learning system, drills and briefings, and completion is recorded. Training time is working time (HR 7.1).
- **Communication.** Facilities uses the portal, posters and short guides to keep people aware of rules, and highlights lessons from incidents and drills.

Appendices

Appendix A – Facilities Portal Request Categories and Service Targets

Category	Examples	Default priority	Response	Resolution target
Emergency and safety	Fire, flood, gas smell, injury, unsafe structure, security breach	P1	15 minutes (business hours); 1 hour (after hours)	Make safe immediately; repair per plan
Building systems	No heating or cooling, no water, lift out, power loss, network-room alert	P1 or P2	15 minutes to 4 business hours	Same business day where possible
General maintenance	Lightbulbs, plumbing, door, ceiling, temperature complaint	P3	1 business day	2 business days (safety-critical lighting 1 business day)
Furniture and ergonomics	Desk or chair repair, ergonomic assessment, storage	P3	1 business day	Repair or replace 5 business days; loaner 1 business day; assessment 5 business days
Access control	Badge issue, lost badge, temporary access, Zone 4 request	P2 (lost badge P1)	4 business hours	Badge changes 2 business days; lost badge deactivated in 15 minutes (business hours)
Visitors and events	Visitor pre-registration, guest room, event support	P3	1 business day	Per event plan

AV	Room faults, booking, AV QR-code tickets	P2 or P3	4 business hours	1 business day
Mail and shipping	Outbound shipments, package pickup, mail issues	P3	1 business day	Shipping 3 business days for remote-employee equipment
Cleaning and pantry	Spills, restroom, coffee machine, restock	P3 (urgent spills P2)	4 business hours	1 business day
Supplies	Special items, stationery	P3	1 business day	2 business days
Moves, adds and changes	Desk or team moves, layout changes	P4	2 business days	Scoped within 10 business days; moves need 5 business days' notice
Accommodations (physical)	Implementation of approved HR accommodation	P2	1 business day	5 business days from HR notice
Parking and commuting	Parking, EV charging, bicycle facilities	P3	2 business days	5 business days
Sustainability ideas and feedback	Suggestions, complaints	P4	2 business days	Reviewed at committee

Appendix B – Visitor Pre-Registration Fields and Visitor Rules Summary

Fields (keep to what is needed):

1. Visitor full name
2. Visitor email (and phone, optional)
3. Visitor organization
4. Purpose of visit and agenda (if relevant)
5. Host name and department
6. Expected arrival date and time
7. Expected duration
8. NDA required? (Yes / No; the electronic NDA is presented at check-in)
9. Access needs (step-free access, interpreter, quiet space, service animal, parking) and any dietary needs for meals (optional)
10. Secure or lab access required? (Yes / No; needs area owner and CISO approval, 2.3, 2.4)

Not collected: date of birth, national ID numbers, home address, copies of IDs.

Visitor rules (shown at check-in): wear your badge; stay with your host; use guest Wi-Fi only; no photography without permission; no smoking or vaping within 25 feet of entrances; follow staff directions in an emergency; return your badge on leaving.

Appendix C – Emergency Contacts and Quick Reference

Numbers and names are held in the Facilities Portal and posted at reception, and are updated whenever they change. The list must include, for each office:

Contact	How to reach
Fire, police, ambulance	911 in the U.S. (dial the outside-line prefix first if the phone system requires it). Outside the U.S., the local number (SIM-GLB-001, Part 5.2)
Facilities Security (24/7 line)	Site number posted at reception and in the emergency app
Facilities Helpdesk (non-emergency)	Facilities Portal or facilities@simtora.example
After-hours building line	Posted number for the on-call Facilities technician or building vendor
IT Security / IT Helpdesk	security@simtora.example ; it@simtora.example (lost devices within 1 hour)
HR	hr@simtora.example ; Chief People Officer
Legal on-call	General Counsel or Legal's on-call contact (government visits, threats, subpoenas)
Compliance Officer	compliance@simtora.example
Ethics Line	ethics@simtora.example (anonymous web form)
Audit Committee	audit@simtora.example
Poison control	1-800-222-1222
Crisis line	988 Suicide and Crisis Lifeline (call or text)
Landlord or building management	Number posted per office
Head of Facilities; Safety and Security Lead; Site Lead	Posted per office

In any emergency: 1) get to safety, 2) call 911, 3) tell the Site Lead or security, 4) follow the wardens, 5) go to the assembly point.

Appendix D – Approval Matrix for Facilities Decisions

Decision	Approval	Reference
Spend up to \$5,000	Head of Facilities (budget owner)	1.4
Spend 5, 000.01–25,000	Department Head	1.4
Spend 25, 000.01–100,000	Head of Facilities and CFO	1.4
Spend 100, 000.01–500,000	CFO and CEO	1.4
Spend over \$500,000	CEO and Board	1.4
Lease, sublease, sale of real property	Board, after Legal review and notice to Controller	7.1
Fit-out above \$100,000	Formal RFP; approval by value	4.7; Procurement 6.6
Biometric access or new monitoring technology	Head of Facilities, CISO and General Counsel (HR consulted)	2.2, 2.5
Release of CCTV footage internally	General Counsel and Chief People Officer (or CISO with Legal for a security incident)	2.5
Release of footage or logs outside Simtora	Legal	2.5, 2.8
Visitor access to Zone 4	Area owner and CISO	2.3, 2.4
Standing after-hours access	Department Head and Facilities	2.6
Assigned desk	Department Head and Facilities	3.1
Exceptions to this manual (max 12 months)	Head of Facilities (plus CISO, CPO, GC as relevant)	1.5
Asset disposal under \$5,000	Department Head (or IT for IT assets)	5.5

000–25,000	Controller and Department Head	5.5
Asset disposal 25, 000.01–100,000	CFO	5.5
Asset disposal 100, 000.01–500,000	CEO	5.5
Asset disposal over \$500,000, or sale to employee or related party	Board	5.5
Office closure (hub office) due to emergency	Head of Facilities (CPO and CISO consulted); Executive Team told within 1 hour	6.7
Owning a generator or shuttle	CFO and CEO (generator); Head of Facilities and CFO (shuttle)	4.2, 3.9
Petty cash float (up to \$500)	CFO (written)	1.4; Finance 4.9
Search of personal property	HR and Legal	2.7

Appendix E – Inspection and Testing Calendar

Item	Frequency	Owner	Record
Office walk-through checklist	Monthly	Site Lead	Checklist and tickets
Fire extinguisher visual check	Monthly	Facilities	Tag and log
Fire extinguisher servicing	Annually	Licensed vendor	Tag and report
Fire alarm and sprinkler inspection and testing	As the fire code requires (typically quarterly, semi-annual or annual), with landlord	Landlord / vendor	Inspection reports
Emergency lighting: function test	Monthly	Facilities	Log
Emergency lighting: full-duration test	Annually	Facilities / vendor	Log
First-aid kit check	Monthly	Facilities	Checklist
AED check	Monthly	Facilities	Log; pad and battery expiry list
Evacuation drill	At least annually (twice for offices over 100 people or more than one floor)	Site Lead	Drill report
Shelter-in-place or lockdown drill	At least every 2 years	Site Lead	Drill report
UPS load test	Quarterly	Facilities	Test report
Generator load test (if any)	Monthly (annual full test by vendor)	Facilities	Test report

Clean-agent suppression inspection (if any)	Twice a year	Vendor	Report
Network-room and Zone 4 environmental control test	Annually	Facilities / IT	Report (IT Policy Manual 5.3)
HVAC filters	Quarterly	Landlord / vendor	Log
Meeting-room AV check	Monthly	IT / AV vendor	Room log
Refrigerator temperature check	Weekly	Facilities	Log
Badge report review	Quarterly	Facilities / Site Lead	Signed report
Zone 4 access-list review	Every 6 months	Area owners / Facilities / IT	Signed list
Zone 4 log review	Monthly (weekly for Restricted-data areas)	IT Security / Facilities	Notes
Standing after-hours access review	Quarterly	Facilities	List
Security risk assessment	Annually and on change	Safety and Security Lead	Report
Workplace safety assessment	Annually and on change	Safety and Security Lead	Report
Accessibility check	Before opening, then every 3 years	Facilities	Report
Emergency notification system test	Twice a year	Facilities / IT	Report

verification	Annual (spot checks quarterly)	Facilities / Controller	Count sheet
Vendor insurance and license check	At renewal; expiry alerts 60 days ahead	Facilities / Procurement	Vendor file
Vendor scorecards	Quarterly	Facilities	Scorecard
Lease critical-date review	Quarterly	Facilities / Legal	Calendar
Sustainability summary	Annually	Facilities	Report
Manual review	Annually	Head of Facilities	Revision history

Appendix F – New Office Opening and Office Closure Checklists

Opening (complete before the first day of use):

1. Board approval of lease; Legal review; Controller told before signing (7.1)
2. Insurance, tax and business registrations (Tax notified at least 30 days ahead); permits and occupancy certificate
3. IT consultation completed: network room, cabling, power, cooling, Wi-Fi and Zone 4 sign-off by CISO (4.7)
4. Fire and life-safety systems tested; exits, signs and emergency lighting checked
5. Emergency action plan written; Chief Warden and ERT appointed and trained; evacuation maps posted (6.2)
6. First-aid kits, AEDs and trained first aiders in place (6.3)
7. Badge system, cameras and visitor system set up and tested; signage installed (Part 2)
8. Lactation room, quiet room and accessible facilities in place and checked (3.3, 3.4)
9. Vendors onboarded: cleaning, security or reception, pest control, catering, waste, shredding and e-waste (7.2, 7.3)
10. Fixed assets tagged and recorded (5.1); furniture and equipment installed
11. Required workplace notices posted or provided electronically

12. Portal, booking tool and emergency notification updated with the new office
13. Employee orientation, drills scheduled, Site Lead named

Closure or downsizing:

1. Board, CFO and Legal approval; lease notice, surrender or sublease terms; Finance told before any lease action (Finance and Accounting Manual 2.6)
2. HR handles employee notice, WARN and state rules; remote-work or relocation plans
3. Customer and vendor notices; mail forwarding; address changes
4. Access: badges, keys and codes removed; alarm and camera systems handed over as agreed
5. Assets: inventory, transfer, sale, donation or disposal under 5.5 and Finance and Accounting Manual 7.3; data destruction certificates
6. Records: paper archive and shredding under 5.6; legal holds respected
7. Restoration obligations completed and landlord inspection scheduled
8. Utilities, services and vendor contracts terminated or transferred
9. Final inspection, keys returned, deposit reclaimed; Finance updated for lease accounting and impairment review
10. Lessons learned recorded

Appendix G – Emergency Action Plan Outline

Each office's plan contains at least:

1. Office details, floors, occupancy on anchor days, hours, landlord and building contacts
2. Emergency reporting: how to raise an alarm, who to call, how responders are met
3. Roles: Chief Warden, floor wardens and deputies, first aiders, Facilities lead, reception and visitor-list holder
4. Evacuation routes and assembly points (with maps); alternate routes; refuge areas
5. Plan for people who need assistance (personal emergency evacuation plans, evacuation chairs)
6. Procedures by scenario: fire, medical, severe weather, earthquake, power loss, flood, hazardous release, bomb threat, workplace violence and active threat, suspicious package, civil disturbance
7. Shelter-in-place and lockdown locations and instructions

8. Accounting for employees and visitors after evacuation
9. Shutdown of critical equipment and utilities (who, how, when it is safe)
10. Communications: emergency notification, media and customer contacts (through the Executive Team)
11. Reoccupation and post-incident review steps
12. Training, drill and review schedule; date of last review and approval

Appendix H – Incident Report Fields

- Report ID, date and time reported, reporter (name may be withheld for anonymous safety reports)
- Date, time and exact location of the incident
- Type: injury or illness, near miss, hazard, security incident, fire, property damage, vendor incident, environmental, other
- People involved (employees, visitors, vendors) and witnesses
- What happened; immediate action taken; first aid or emergency services called
- Injury details if any (kept by HR, not in the shared portal); OSHA-reportable? (Yes / No; 6.1)
- Equipment or systems involved; photos or footage preserved (2.5)
- Immediate cause; root cause; corrective actions, owners and due dates
- Notifications made (Head of Facilities, CISO, CPO, General Counsel, CEO, insurer, landlord)
- Closure date and reviewer

Appendix I – Vendor-on-Premises Rules and Contractor Safety Checklist

Rules for all vendor staff:

1. Sign in at reception and wear the vendor badge; follow the escort rules
2. Do not enter Zone 4 areas unless scheduled and escorted
3. Do not connect equipment to the Company network or plug into ports without IT approval

4. Do not photograph or copy screens, whiteboards or documents
5. Keep work areas tidy and clear of exits; protect occupied areas from dust and noise
6. Follow Simtora safety, anti-harassment and conduct rules; report injuries and near misses at once
7. Do not accept or offer gifts beyond the limits in the Code of Ethics and Compliance Manual
8. Use the designated entrance, loading area and parking
9. Follow the instructions of wardens and Facilities staff in an emergency
10. Take away waste and hazardous materials, and follow chemical and waste rules

Checklist before work (Facilities): signed contract and PO; insurance certificates valid; licenses checked; safety plan or job hazard analysis; permits; landlord approval; briefing done; badges issued; schedule and access agreed; hot-work permit if needed; emergency contact list given; close-out items listed (warranties, as-builts, lien waivers).

Appendix J – Glossary

Term	Meaning
AED	Automated external defibrillator
Anchor days	Tuesday, Wednesday and Thursday, when hybrid employees are expected in the office
ASC 842	The lease accounting standard used by Finance
Business day	A weekday that is not a Company holiday
CMMS	Computerized maintenance management system used by Facilities
ERT	Emergency Response Team: wardens, first aiders and Facilities lead at each office
EAP	Emergency action plan (also Employee Assistance Program in HR; context shows which)
Hub office	A larger staffed office with full services
P1 to P4	Priority levels for portal requests (1.3)
Site Lead	The Facilities Manager or Office Administrator responsible for an office
VMS	Visitor Management System
Zone 1 to 4	Security zones from public to secure (2.1)
Safety and Security Lead	Facilities role that runs the safety and security program
PUMP Act	Federal law requiring break time and private space to express breast milk
NIST SP 800-88	Standard for media sanitization used for data destruction
R2v3 / e-Stewards	Certifications for responsible electronics recyclers

Appendix K – Revision History

Version	Date	Author	Approved by	Summary
1.0	September 30, 2026	Head of Facilities	CEO	Initial release
1.1	October 5, 2026	Head of Facilities	CEO	Added "Locations outside the United States"; emergency-number note in Appendix C; cross-references to SIM-GLB-001 Part 5

End of Facilities and Office Administration Manual (SIM-FAC-001)
